

FOCUS FLOW · READ

Quick Start Guide

from download to your first sprint in 3 minutes

The screenshot displays the Focus Flow Read app interface. On the left is a navigation sidebar with icons for Today, Library, Sprint, To read, Quotes & notes, Stats, and Settings. The main content area is titled "Good morning, Sam." and shows progress for "Piranesi" by Susanna Clarke. It includes a "Reading now" section with a progress bar, a "This year" section with a progress bar, and a "From your quotes" section. On the right, there's a "Today" summary, an "Up next" list of books, and a "I feel like..." section with mood-based recommendations.

- quick cry laugh

Focus Flow Read v1.0

a reading tracker for ADHD brains: a library with progress, reading sprints with a timer and body doubling, a TBR that stays short, quotes, a yearly goal without guilt, and stats.

Hi. This will be quick.

Focus Flow Read is a real app that lives in a single file. There is no account, no server and nothing to install. One book on the go (or two, or five — we don't judge), a pile that stays short, ten-minute sprints with a timer, and a yearly goal that is a number rather than a verdict. That's the whole method.

Everything you type stays on your device. Nobody can see it — not us, not anyone. The trade-off is that **you** are in charge of backups (see "Your data"). It's one tap; the app reminds you.

What's in your download

FILE	WHAT IT IS
Focus-Flow-Read.html	The app. Keep this file somewhere safe (your Documents folder is perfect).
Focus-Flow-Read-Quick-Start-Guide.pdf	This guide.
README.txt	The two-line version of this guide, with your iPhone link.

The 3-minute start

- 1 **Unzip the download.** Windows: right-click → Extract All. Mac: double-click the ZIP.
- 2 **Open Focus-Flow-Read.html.** Double-click it. If it opens in the wrong program, right-click → Open with → Chrome / Edge / Firefox / Safari.
- 3 **Bookmark it** (Ctrl/Cmd + D) so it's one click away from now on.
- 4 **Answer 3 quick questions:** your name and a gentle goal, the book on your nightstand, three for the pile. Or tap *"Explore with example data"* first.
- 5 **Press ► Sprint** on Today. When it ends, type the page you're on. Done.

Nothing you do here is permanent. Every delete has an Undo. "Start fresh" is always in Settings. Play.

Reading now, this year, up next

Reading now. The book you touched last, with page, percent and — once the app knows your pace — "about 2 h to go". Two buttons: a sprint, or log pages by hand. More books on the go are one tap away.

This year. Finished count against your goal, and where the calendar says you'd be. Ahead? Read whatever you like. Behind? It's a number. Audiobooks, comics and re-reads all count.

Up next shows the top of the pile with a Start button. **I feel like...** picks a book from the pile by mood (comfort, learn, escape, quick, cry, laugh) — tag books with a mood when you add them. 🎲 picks at random.

From your quotes shows one line a day.

Press **p** anywhere to log pages on the current book.

The disc, and body doubling

Pick a book, pick a length, press start. The disc shrinks as time passes — a visual timer for time blindness. Ten minutes is a real sprint; fifteen is the default.

Body doubling

Reading next to someone makes starting easier. Steady noise does a surprising amount of that job. Tap **Body doubling** to play brown, pink, rain-like or white noise (choose in Settings). Headphones help.

When the sprint ends

A chime, then a small box: the page you're on now, and an optional thought. **Log & another** logs pages and minutes against the book and starts the next sprint. Reaching the last page finishes the book with a small celebration.

Space starts and pauses on this screen.
Shift+F hides everything else.

Progress, formats, moods, and Someday

A book has a title, author, pages (or minutes for audio), format, genre, a mood it fits, a cover emoji and colour. Statuses: reading, to read, someday, paused, finished, abandoned.

Abandoned is a status, not a failure — it even gets its own shelf.

Reading-now rows show a progress bar and the estimated time left; + pages logs progress, ► starts a sprint.

To read

The pile has five slots (change it in Settings). Anything beyond that goes to **Someday**, where it waits without nagging. ↑ reorders, Start moves a book to Reading now, 📖 sends it to Someday.

Finishing

Rate it with stars while it's fresh and write one line for future you. Both show in the Library and in Stats.

The lines and the numbers

Quotes & notes

Tap + while the line is in front of you: the text, the book, the page, and why it landed. Searchable. One appears on Today each day.

Stats

Books finished by month, pages and minutes logged, abandoned count (allowed), a 28-day minutes chart, days with reading (days — never streaks), average on a reading day, genres, formats, your top-rated pick and your average rating. Arrows move between years; the goal year is in Settings.

If the goal starts feeling like a chore, lower it. Settings → Books this year. The app will not mind.

Where your data lives, and how to keep it safe

The app saves automatically to your browser's local storage on this device. It never sends anything anywhere. That means two things:

✓ Private by design

No account, no password, no email, no tracking. Closing the tab, restarting the computer, going offline — all fine, your data is still there when you come back.

⚠ Backups are yours to make

Clearing browser data, using a private/incognito window, or some "cleaner" apps can wipe local storage. So, once in a while (the app reminds you after 14 days of changes):

- 1 Settings → **Download backup**. A small .json file lands in your Downloads.
- 2 Move it somewhere you'll find it (a folder, or your cloud drive).
- 3 To restore — on this or any other device — Settings → **Restore a backup** and pick the file.

Encrypted backups

Settings → **Encrypted backup** locks the file with a passphrase you choose (AES-256). Perfect for cloud drives. There is no reset — if you lose the passphrase, nobody can open it, not even us.

Using the app in a private/incognito window will lose your data when the window closes. Use a normal window.

Sharing a home or a household? Each person opens the file in their own browser profile — data is kept separately.

Opening the app on each device

DEVICE	HOW
Windows	Keep the .html file in Documents. Double-click → opens in Edge or Chrome. Bookmark it. Optional: in Edge/Chrome, menu → "Install page as app" / "Create shortcut" → it gets its own window and icon.
Mac	Keep the file in Documents. Double-click → Safari (or right-click → Open With → Chrome). Bookmark it, or drag the address bar icon to the Dock.
Chromebook / Linux	Open the file in Chrome from the Files app. Bookmark it.
Android	Copy the file to your phone (email it to yourself, or use Google Drive → Download). Open it with Chrome from the Files app. Chrome menu : → Add to Home screen gives you an app icon.
iPhone / iPad	Open https://pablo96si.github.io/focusflow-read/ in Safari. Tap the Share button (the square with an arrow) → Add to Home Screen → Add. You now have a Focus Flow icon that opens full-screen, works offline and keeps your data on your phone. The link only serves the app — nothing you type is sent to it. Please keep the link private; it is part of your purchase.

The web-app link works everywhere

The same link also works in Chrome on Android (menu : → Add to Home screen), in Edge/Chrome on Windows (Install app) and in Safari on Mac. Use the file or the link — whichever you prefer. Data is stored separately in each, so pick one and use a backup file to move between them.

Moving to a new device

Old device: Settings → Download backup. New device: open the app → Settings → Restore a backup. Two minutes.

Updates

Re-download from your Etsy purchases page any time. Open the new file, then Restore a backup if your data isn't already there.

Little questions, quick answers

Audiobooks?

Set the format to Audio and enter total minutes in "pages". Log the minute you're at the same way you'd log a page.

I read five books at once.

Fine. They all show under Reading now, most recent first; Today features the one you touched last.

Can I import from Goodreads?

Not yet — the app is deliberately small. Add the ones you're reading and the pile; the back catalogue can stay where it is.

The noise doesn't play.

Browsers only start audio after you tap something. Tap the Body doubling button once, and check the phone isn't on silent.

Something looks wrong on my screen.

Try a different browser (Chrome, Edge, Firefox and Safari are all supported), and make sure it's up to date. Then message us on Etsy with a screenshot — we answer.
