

FOCUS FLOW · SOBER

Quick Start Guide

from download to your first surfed urge in 3 minutes

Focus Flow Sober v1.0

a sobriety companion that stays in your pocket and out of the cloud: a day counter with milestones, a 10-minute urge surfer with your own reasons on screen, an urge log that shows your triggers and danger hours, a 30-second daily check-in, money and time saved with goals, and a calendar that honours slips without erasing the history.

Hi. This will be quick.

Focus Flow Sober is a real app that lives in a single file. There is no account, no server and nothing to install — nobody can see it, which for this one matters. It counts the days, surfs the urges with your own reasons on screen, ranks your triggers and danger hours, checks in nightly in thirty seconds, and shows the money and hours coming back. A slip resets the counter, not the history. It is a notebook and a wave board, not treatment; if you are in danger, call your local emergency number or a crisis line.

Everything you type stays on your device. Nobody can see it — not us, not anyone. The trade-off is that **you** are in charge of backups (see "Your data"). It's one tap; the app reminds you.

What's in your download

FILE	WHAT IT IS
Focus-Flow-Sober.html	The app. Keep this file somewhere safe (your Documents folder is perfect).
Focus-Flow-Sober-Quick-Start-Guide.pdf	This guide.
README.txt	The two-line version of this guide, with your iPhone link.

The 3-minute start

- 1 Unzip the download.** Windows: right-click → Extract All. Mac: double-click the ZIP.
- 2 Open Focus-Flow-Sober.html.** Double-click it. If it opens in the wrong program, right-click → Open with → Chrome / Edge / Firefox / Safari.
- 3 Bookmark it** (Ctrl/Cmd + D) so it's one click away from now on.
- 4 Answer 3 quick questions:** what you're stepping away from and your day 1, what it cost per day, two reasons. Or tap *"Explore with example data"* first.
- 5 Every night (c):** 30-second check-in. **When it hits (space):** the surfer. Ten minutes. Then "It passed — log it".

Nothing you do here is permanent. Every delete has an Undo. "Start fresh" is always in Settings. Play.

TODAY

The counter and the button

The big number is days. Under it: money kept and hours back, and the progress to the next milestone (1 day, 3, a week, two, three, a month, two, three, four, six, nine, a year...). The button is **"I'm having an urge"**. Around it: today's check-in, your reasons, this week's numbers, your wins, and a calm card for when it's bad.

Wins are the list you read on a bad day. "Went to the party, drank soda, left at 11." Log them the day they happen.

Ten minutes, three steps

A ten-minute countdown (length in Settings) with three steps that light up as time passes: **Name it** — a wave in the body, not an instruction. **Play the tape forward** — not the first one, the third one, the morning. **Do one thing** — water, a door, a text, a shower. Your reasons sit underneath in your own words. **+5 min** if it's still loud.

When it's over: **"It passed — log it"** opens the log with the outcome set. **"Log it anyway"** is there too, without judgement. Gave in is a data point.

Triggers rank themselves

Each urge: date, time, strength 1–5, outcome, what set it off (15 chips: stress, boredom, after work, social, loneliness, celebration...), what you did (11 chips: walked, water, called someone, played the tape forward...), a line. The screen then shows **triggers ranked**, **danger hours** as bars across the day, **urges per week**, and **what worked** counted from your own passed urges.

The top two triggers and the tallest hour bar are your plan. "18:00, after work" means the dog gets walked at 17:55.

Thirty seconds a night

Check-in: mood (five faces), craving 0–5, HALT flags, sleep, one line. **Saved:** money not spent and hours back this streak and since you first started; goals that fill up with the days.

Progress: a calendar with sober days filled, faces for mood, waves for urges, amber for a reset; 30-day averages; HALT ranked; resets listed with the streak they ended — it was real.

Had a slip? Settings → Reset the counter.
Everything else stays.

Where your data lives, and how to keep it safe

The app saves automatically to your browser's local storage on this device. It never sends anything anywhere. That means two things:

✓ Private by design

No account, no password, no email, no tracking. Closing the tab, restarting the computer, going offline — all fine, your data is still there when you come back.

⚠ Backups are yours to make

Clearing browser data, using a private/incognito window, or some "cleaner" apps can wipe local storage. So, once in a while (the app reminds you after 14 days of changes):

- 1 Settings → **Download backup**. A small .json file lands in your Downloads.
- 2 Move it somewhere you'll find it (a folder, or your cloud drive).
- 3 To restore — on this or any other device — Settings → **Restore a backup** and pick the file.

Encrypted backups

Settings → **Encrypted backup** locks the file with a passphrase you choose (AES-256). Perfect for cloud drives. There is no reset — if you lose the passphrase, nobody can open it, not even us.

Using the app in a private/incognito window will lose your data when the window closes. Use a normal window.

Sharing a home or a household? Each person opens the file in their own browser profile — data is kept separately.

Opening the app on each device

DEVICE	HOW
Windows	Keep the .html file in Documents. Double-click → opens in Edge or Chrome. Bookmark it. Optional: in Edge/Chrome, menu → "Install page as app" / "Create shortcut" → it gets its own window and icon.
Mac	Keep the file in Documents. Double-click → Safari (or right-click → Open With → Chrome). Bookmark it, or drag the address bar icon to the Dock.
Chromebook / Linux	Open the file in Chrome from the Files app. Bookmark it.
Android	Copy the file to your phone (email it to yourself, or use Google Drive → Download). Open it with Chrome from the Files app. Chrome menu : → Add to Home screen gives you an app icon.
iPhone / iPad	Open https://pablo96si.github.io/focusflow-sober/ in Safari. Tap the Share button (the square with an arrow) → Add to Home Screen → Add. You now have a Focus Flow icon that opens full-screen, works offline and keeps your data on your phone. The link only serves the app — nothing you type is sent to it. Please keep the link private; it is part of your purchase.

The web-app link works everywhere

The same link also works in Chrome on Android (menu : → Add to Home screen), in Edge/Chrome on Windows (Install app) and in Safari on Mac. Use the file or the link — whichever you prefer. Data is stored separately in each, so pick one and use a backup file to move between them.

Moving to a new device

Old device: Settings → Download backup. New device: open the app → Settings → Restore a backup. Two minutes.

Updates

Re-download from your Etsy purchases page any time. Open the new file, then Restore a backup if your data isn't already there.

Little questions, quick answers

Is this only for alcohol?

No. "What you're stepping away from" is a free text: smoking, weed, gambling, porn, sugar, anything with urges and a day count.

Can anyone see it?

No. The file and its data live on your device only. No account, no cloud, no analytics. Encrypted backups if you want a copy somewhere.

What if I slip?

Reset the counter in Settings. The streak is recorded, the check-ins and urges and reasons stay, day 1 starts today. Most people who get there had a few day-ones.

Is it a treatment?

No. It's a notebook with a wave board. If you have withdrawal symptoms, a medical condition, or thoughts of harming yourself, talk to a doctor or call a crisis line. Groups and therapists help; this app just helps you remember and see.

Something looks wrong on my screen.

Try a different browser (Chrome, Edge, Firefox and Safari are all supported), and make sure it's up to date. Then message us on Etsy with a screenshot — we answer.
