

FOCUS FLOW · MOOD

Quick Start Guide

from download to your first check-in in 3 minutes

Focus Flow Mood v1.0

a mood & anxiety journal for ADHD and neurodivergent brains: 30-second check-ins, feelings wheel, triggers, a coping toolbox, brain dump, gratitude, and patterns you can show a therapist.

**FOCUS
FLOW**

Hi. This will be quick.

Focus Flow Mood is a real app that lives in a single file. There is no account, no server and nothing to install. You tap one emoji, maybe a feeling or two, maybe a trigger. After a couple of weeks the app shows you patterns, and on the hard days it hands you the toolbox you filled on a good one. That's the whole method.

Everything you type stays on your device. Nobody can see it — not us, not anyone. The trade-off is that **you** are in charge of backups (see "Your data"). It's one tap; the app reminds you.

What's in your download

FILE	WHAT IT IS
Focus-Flow-Mood.html	The app. Keep this file somewhere safe (your Documents folder is perfect).
Focus-Flow-Mood-Quick-Start-Guide.pdf	This guide.
README.txt	The two-line version of this guide, with your iPhone link.

The 3-minute start

- 1 **Unzip the download.** Windows: right-click → Extract All. Mac: double-click the ZIP.
- 2 **Open Focus-Flow-Mood.html.** Double-click it. If it opens in the wrong program, right-click → Open with → Chrome / Edge / Firefox / Safari.
- 3 **Bookmark it** (Ctrl/Cmd + D) so it's one click away from now on.
- 4 **Answer 3 quick questions:** your name, a few tools that help, and one emoji for right now. Or tap *"Explore with example data"* first.
- 5 **Come back whenever.** Morning, evening, mid-spiral. There are no streaks to keep.

Nothing you do here is permanent. Every delete has an Undo. "Start fresh" is always in Settings. Play.

Check-ins, brain dump, gratitude, the last 14 days

Check-in. One emoji is a complete check-in. Anxiety and energy scales, the feelings wheel, triggers and a one-line note are all optional. Edit or delete any check-in later.

Rough one? After a low check-in, Today shows a small card with four things from your toolbox and a "breathe with me" button. You don't have to fix anything.

Brain dump. Everything that's looping, no grammar. It lands in the Journal and you can delete it afterwards — the writing is the point.

Last 14 days. One coloured square per day, average mood. **Gratitude:** three real things, saved per day. Small and specific beats big and vague.

Press **n** anywhere for a new check-in, **b** for breathing.

Words for when you don't have them

Mood (five emoji), anxiety and energy (1-5). Then the **feelings wheel**: six families — happy, sad, anxious, angry, numb, excited — with six precise words each. "Bad" is a smoke alarm; "overwhelmed and unheard" is information. Alexithymia is common with ADHD, so the words are already here.

Triggers are one-tap chips: poor sleep, skipped meds, too many tabs, sensory overload, rejection, doom-scrolling... Add your own with "+ other". Over time the Patterns screen shows which triggers usually come with a low mood.

When you edit a check-in you can also say **what you tried and whether it helped**. That is how the toolbox learns what works for you specifically.

Pre-decided help

The toolbox is four lists — when anxious, when low, when numb or stuck, when angry or overstimulated. Each tool is small and specific with a time: "walk to the corner and back · 10 min". **Ideas** gives you twelve to start; edit the wording so it sounds like you.

Do it opens a small card; when you're back, say whether it helped. Every tool shows how often it helped, in your own numbers.

Safety card

People you can text, helplines or your therapist, and a few things that are true even when your brain says otherwise. It appears on the Calm now screen.

Calm now

Box breathing (4-4-4-4), 4-7-8, or slow 5-5 with a circle that grows and shrinks — follow the circle if numbers are too much. 5-4-3-2-1 grounding, then "one small next thing" from your toolbox.

This app is a journal, not a crisis service. If you are in danger, contact your local emergency number or a crisis line.

What the last weeks actually look like

Pick 14, 30 or 90 days. **Mood over time** as coloured bars, average anxiety, the count of low and good days. **Triggers** by frequency, red when they usually come with a low mood. **Feelings named most**. **Mood by day of the week** and **by time of day** — many people discover their Sundays or their 4 pm.

What actually helps ranks your tools by the share of times you said they helped.

Print gives you a clean page to bring to therapy, so the session can start with the pattern instead of "so how have you been".

Journal

Brain dumps, gratitude lists, wins, and notes marked "for therapy". Searchable. Check-in notes are listed underneath.

Where your data lives, and how to keep it safe

The app saves automatically to your browser's local storage on this device. It never sends anything anywhere. That means two things:

✓ Private by design

No account, no password, no email, no tracking. Closing the tab, restarting the computer, going offline — all fine, your data is still there when you come back.

⚠ Backups are yours to make

Clearing browser data, using a private/incognito window, or some "cleaner" apps can wipe local storage. So, once in a while (the app reminds you after 14 days of changes):

- 1 Settings → **Download backup**. A small .json file lands in your Downloads.
- 2 Move it somewhere you'll find it (a folder, or your cloud drive).
- 3 To restore — on this or any other device — Settings → **Restore a backup** and pick the file.

Encrypted backups

Settings → **Encrypted backup** locks the file with a passphrase you choose (AES-256). Perfect for cloud drives. There is no reset — if you lose the passphrase, nobody can open it, not even us.

Using the app in a private/incognito window will lose your data when the window closes. Use a normal window.

Sharing a home or a household? Each person opens the file in their own browser profile — data is kept separately.

Opening the app on each device

DEVICE	HOW
Windows	Keep the .html file in Documents. Double-click → opens in Edge or Chrome. Bookmark it. Optional: in Edge/Chrome, menu → "Install page as app" / "Create shortcut" → it gets its own window and icon.
Mac	Keep the file in Documents. Double-click → Safari (or right-click → Open With → Chrome). Bookmark it, or drag the address bar icon to the Dock.
Chromebook / Linux	Open the file in Chrome from the Files app. Bookmark it.
Android	Copy the file to your phone (email it to yourself, or use Google Drive → Download). Open it with Chrome from the Files app. Chrome menu : → Add to Home screen gives you an app icon.
iPhone / iPad	Open https://pablo96si.github.io/focusflow-mood/ in Safari. Tap the Share button (the square with an arrow) → Add to Home Screen → Add. You now have a Focus Flow icon that opens full-screen, works offline and keeps your data on your phone. The link only serves the app — nothing you type is sent to it. Please keep the link private; it is part of your purchase.

The web-app link works everywhere

The same link also works in Chrome on Android (menu : → Add to Home screen), in Edge/Chrome on Windows (Install app) and in Safari on Mac. Use the file or the link — whichever you prefer. Data is stored separately in each, so pick one and use a backup file to move between them.

Moving to a new device

Old device: Settings → Download backup. New device: open the app → Settings → Restore a backup. Two minutes.

Updates

Re-download from your Etsy purchases page any time. Open the new file, then Restore a backup if your data isn't already there.

Little questions, quick answers

I forgot for a week.

Nothing breaks. There are no streaks. Do one check-in now; the grid shows grey squares for missed days and that's all.

Can I check in more than once a day?

Yes — morning and evening is a lovely rhythm, and the Patterns screen compares times of day.

Is this therapy?

No. It is a journal with good defaults. It works best alongside a person — bring the Patterns printout.

Can someone else see it on a shared computer?

Anyone using the same browser profile could open it. Use your own profile, or lock the computer. Encrypted backups keep the file itself safe.

Something looks wrong on my screen.

Try a different browser (Chrome, Edge, Firefox and Safari are all supported), and make sure it's up to date. Then message us on Etsy with a screenshot — we answer.
