

FOCUS FLOW · INVENTORY

Quick Start Guide

from download to "found it" in 3 minutes

Focus Flow Inventory v1.0

a home inventory and "where is it?" finder: every item with its room and exact spot, search that answers in one second, lent-out tracking, warranties and receipts, and an insurance-ready value report by room.

Hi. This will be quick.

Focus Flow Inventory is a real app that lives in a single file. There is no account, no server and nothing to install. Every item gets a room and an exact spot; search answers in a second; lent-out things come back; warranties and receipts live in one table; and the insurance report prints itself. That's the whole method.

Everything you type stays on your device. Nobody can see it — not us, not anyone. The trade-off is that **you** are in charge of backups (see "Your data"). It's one tap; the app reminds you.

What's in your download

FILE	WHAT IT IS
Focus-Flow-Inventory.html	The app. Keep this file somewhere safe (your Documents folder is perfect).
Focus-Flow-Inventory-Quick-Start-Guide.pdf	This guide.
README.txt	The two-line version of this guide, with your iPhone link.

The 3-minute start

- 1 Unzip the download.** Windows: right-click → Extract All. Mac: double-click the ZIP.
- 2 Open Focus-Flow-Inventory.html.** Double-click it. If it opens in the wrong program, right-click → Open with → Chrome / Edge / Firefox / Safari.
- 3 Bookmark it** (Ctrl/Cmd + D) so it's one click away from now on.
- 4 Answer 3 quick questions:** your rooms, the things you always lose, the three expensive things. Or tap *"Explore with example data"* first.
- 5 Type anything** on the Find screen. Add things as you notice them — a spot matters more than a photo.

Nothing you do here is permanent. Every delete has an Undo. "Start fresh" is always in Settings. Play.

WHERE IS IT?

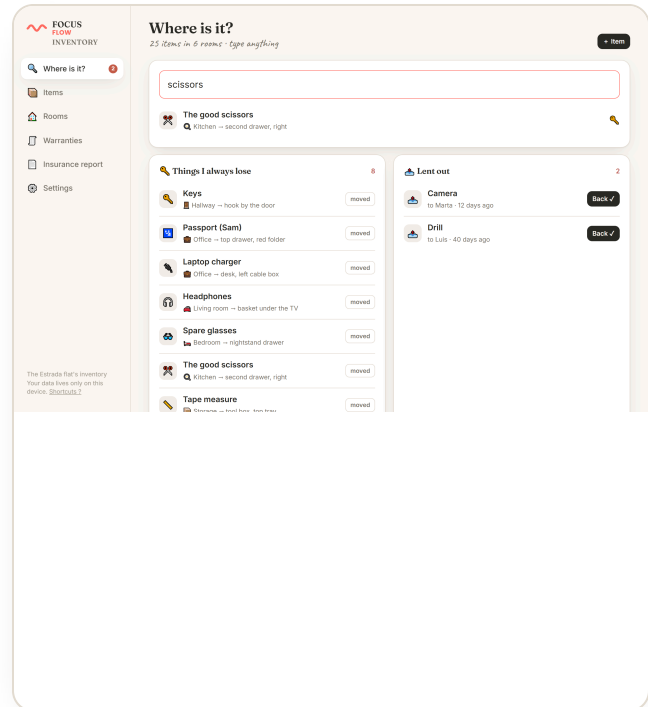

Search, the usual suspects, lent out

The search box matches any word against name, brand, model, room, spot, tags and notes: "scissors", "sony", "blue folder", "red" all work. Results show the room and the exact spot. No match? Add it from the same line.

Things I always lose lists items tagged 🔑 with their spot — keys, passport, charger, glasses. The trick is one fixed spot per thing; the app just remembers it. **Moved** opens the item to change the spot.

Lent out shows what is at someone else's house and since when. **Back** ✓ when it returns.

Press / anywhere to jump to search, a to add an item.

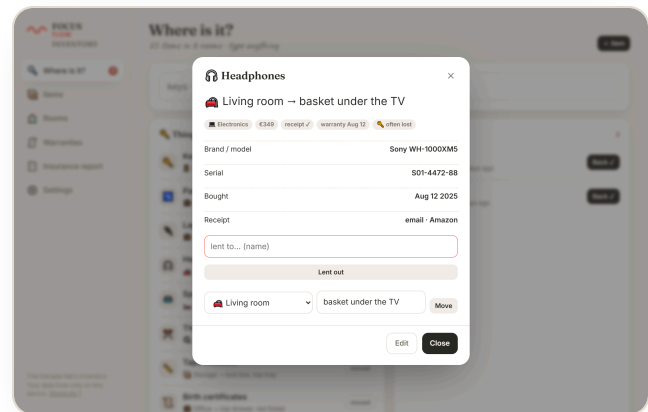

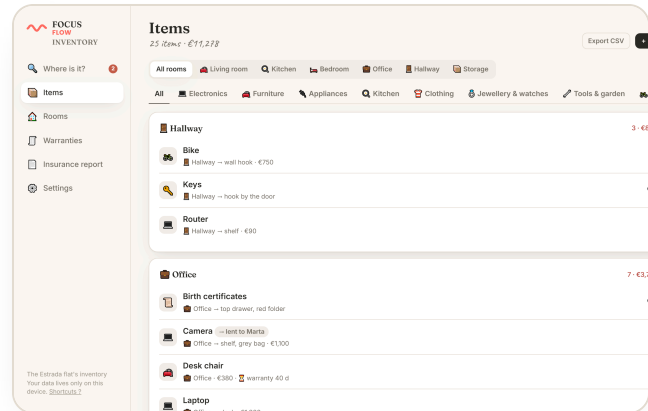

A name and a spot

Items

Grouped by room, filtered by room and category (electronics, furniture, appliances, kitchen, clothing, jewellery, tools, sport, documents, kids, art, other). Each item: name, emoji, room, exact spot, category, replacement value, brand, model, serial, bought date, warranty date, where the receipt is, "often lost", note. Open one to **lend** it or **move** it in two taps. **Export CSV** for a spreadsheet.

Rooms

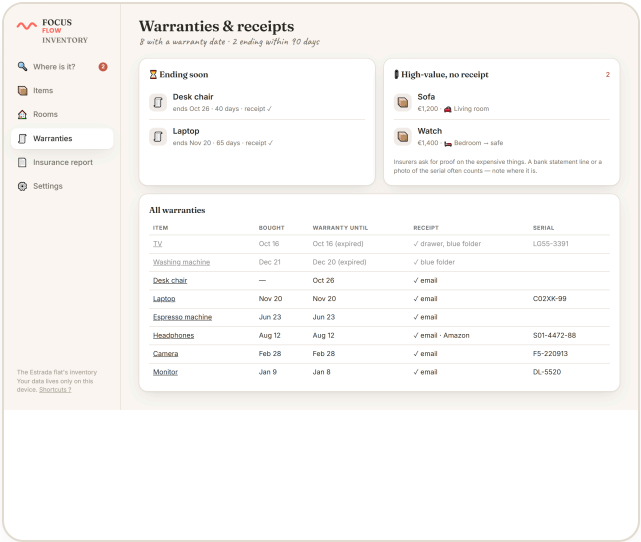

Each room with item count, value, high-value count and the spots you've used. Load ten typical rooms and rename what doesn't fit.

Before you need them

Ending soon: warranties ending within 90 days, with the day count and whether you have the receipt. **High-value, no receipt:** the expensive things without proof — a bank statement line or a photo of the serial often counts, note where it is. **All warranties:** one table with bought date, warranty end, receipt location and serial; expired ones greyed.

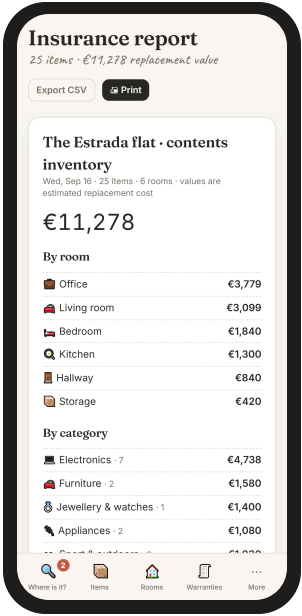

When something expensive arrives: add it, tick the receipt, type the serial. Two minutes now, an hour saved in a claim.

One page, once a year

Total replacement value at the top. **By room** and **by category** breakdowns. **High-value items** (at or above your threshold, Settings) in a table with room, brand/model, serial, bought date, receipt and value. **Print** for a clean page; **Export CSV** for the insurer's spreadsheet.

Most contents policies want exactly this: what it is, roughly when bought, roughly what it would cost to replace, and proof for the expensive things. Update the report when something big arrives, and print a copy once a year.

Where your data lives, and how to keep it safe

The app saves automatically to your browser's local storage on this device. It never sends anything anywhere. That means two things:

✓ Private by design

No account, no password, no email, no tracking. Closing the tab, restarting the computer, going offline — all fine, your data is still there when you come back.

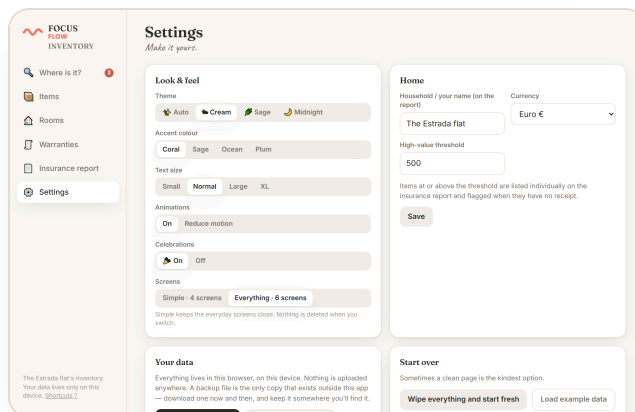

⚠ Backups are yours to make

Clearing browser data, using a private/incognito window, or some "cleaner" apps can wipe local storage. So, once in a while (the app reminds you after 14 days of changes):

- 1 Settings → **Download backup**. A small .json file lands in your Downloads.
- 2 Move it somewhere you'll find it (a folder, or your cloud drive).
- 3 To restore — on this or any other device — Settings → **Restore a backup** and pick the file.

Encrypted backups

Settings → **Encrypted backup** locks the file with a passphrase you choose (AES-256). Perfect for cloud drives. There is no reset — if you lose the passphrase, nobody can open it, not even us.

Using the app in a private/incognito window will lose your data when the window closes. Use a normal window.

Sharing a home or a household? Each person opens the file in their own browser profile — data is kept separately.

Opening the app on each device

DEVICE	HOW
Windows	Keep the .html file in Documents. Double-click → opens in Edge or Chrome. Bookmark it. Optional: in Edge/Chrome, menu → "Install page as app" / "Create shortcut" → it gets its own window and icon.
Mac	Keep the file in Documents. Double-click → Safari (or right-click → Open With → Chrome). Bookmark it, or drag the address bar icon to the Dock.
Chromebook / Linux	Open the file in Chrome from the Files app. Bookmark it.
Android	Copy the file to your phone (email it to yourself, or use Google Drive → Download). Open it with Chrome from the Files app. Chrome menu : → Add to Home screen gives you an app icon.
iPhone / iPad	Open https://pablo96si.github.io/focusflow-inventory/ in Safari. Tap the Share button (the square with an arrow) → Add to Home Screen → Add. You now have a Focus Flow icon that opens full-screen, works offline and keeps your data on your phone. The link only serves the app — nothing you type is sent to it. Please keep the link private; it is part of your purchase.

The web-app link works everywhere

The same link also works in Chrome on Android (menu : → Add to Home screen), in Edge/Chrome on Windows (Install app) and in Safari on Mac. Use the file or the link — whichever you prefer. Data is stored separately in each, so pick one and use a backup file to move between them.

Moving to a new device

Old device: Settings → Download backup. New device: open the app → Settings → Restore a backup. Two minutes.

Updates

Re-download from your Etsy purchases page any time. Open the new file, then Restore a backup if your data isn't already there.

Little questions, quick answers

Do I need photos?

No. A name, a room and a spot is the useful part. Note where the receipt or the serial photo lives instead.

Two homes, or a storage unit?

Add them as rooms ("Storage unit", "Mum's garage"). Or keep two copies of the file in two folders.

Is the value the price I paid?

Use replacement cost — what it would cost to buy again today. That is what insurers use.

Two people, one home?

Keep the file on a shared device, or share a backup file — everyone sees the same spots.

Something looks wrong on my screen.

Try a different browser (Chrome, Edge, Firefox and Safari are all supported), and make sure it's up to date. Then message us on Etsy with a screenshot — we answer.
