

FOCUS FLOW · KIDS

Quick Start Guide

from download to the first routine in 3 minutes

Focus Flow Kids v1.0

a visual routine and chore app for ADHD and autistic kids: picture routines that run one big step at a time with a timer, a chore chart with stars and rewards, feelings check, and a family mode for several children.

Hi. This will be quick.

Focus Flow Kids is a real app that lives in a single file. There is no account, no server and nothing to install. You set up your children, a few picture routines and chores, then tap Kid mode and hand over the tablet or phone. One picture at a time, a timer they can see, a Done button they can hit, stars that land and never get taken away. That's the whole method.

Everything you type stays on your device. Nobody can see it — not us, not anyone. The trade-off is that **you** are in charge of backups (see "Your data"). It's one tap; the app reminds you.

What's in your download

FILE	WHAT IT IS
Focus-Flow-Kids.html	The app. Keep this file somewhere safe (your Documents folder is perfect).
Focus-Flow-Kids-Quick-Start-Guide.pdf	This guide.
README.txt	The two-line version of this guide, with your iPhone link.

The 3-minute start

- 1 Unzip the download.** Windows: right-click → Extract All. Mac: double-click the ZIP.
- 2 Open Focus-Flow-Kids.html.** Double-click it. If it opens in the wrong program, right-click → Open with → Chrome / Edge / Firefox / Safari.
- 3 Bookmark it** (Ctrl/Cmd + D) so it's one click away from now on.
- 4 Answer 3 quick questions:** names, the routines you want, chores and rewards. Or tap *"Explore with example data"* first.
- 5 Tap Kid mode** on Today and hand it over. Shift+K on a keyboard.

Nothing you do here is permanent. Every delete has an Undo. "Start fresh" is always in Settings. Play.

One child at a time

Tabs at the top switch between children. Everything below is theirs: routines due in this part of the day, chores for today as big tap buttons, their star balance, a quick feelings check, and a week of dots.

Routines now. Morning routines show before noon, after-school ones in the afternoon, bedtime from five. ▶ Start opens the runner. A finished routine shows "All done 🌟" and can be reset.

Chores today. Tap = done, the star lands with a chime. Tap again to undo. Stars are never removed for a missed chore.

Kid mode. Hides the menu and small buttons, makes everything big. Leave with the 👤 Parent button — set a 4-digit parent code in Settings if you need one.

Every child has their own stars, chart and routines. Routines and chores can be "for everyone" or for one child.

One big picture, a timer, a Done button

A routine is a short list of picture steps with minutes: 🦷 Brush teeth · 2. **Templates** gives you six to start (morning, after school, bedtime, homework, tidy-up, calm down). Cut steps until it's easy; six is plenty.

The runner

► Start shows one step at a time: a big emoji, the step, a shrinking timer with a soft chime at zero, and a giant **Done** ✓. Skip is allowed. When the last step is done: confetti, a trophy, and stars for finishing. Enter on a keyboard = Done.

On the Routines screen you can also tick steps directly on the card, and reset today's progress.

Calm down

A four-step calm-down routine is in Templates. On the Feelings screen, "Angry" or "Overwhelmed" offers it with one tap.

Stars that land and never leave

The chart is one week per child: chores down the side, days across. Tap a square to mark it done — the star count updates instantly. Chores can be worth 1–20 stars, happen on certain days only, and belong to one child or everyone.  prints a clean chart for the fridge.

Bonus stars (" + Bonus star" on Today) are for kindness, effort, anything you want to notice. Every star is listed with its reason under Family → Star history.

Rewards

A small shop with a progress bar towards each reward. **Ideas** offers seven; let your child help choose. Redeeming subtracts the stars and celebrates. Time and choices ("stay up 30 min later", "choose Friday dinner") tend to work better than things.

Big buttons, no wrong answers

Eight feelings as big buttons: happy, sad, angry, scared, tired, silly, overwhelmed, bored. Tapping one logs it and shows one idea that helps — "stomp 10 times, squeeze a pillow, five breaths" — rather than a lecture. The last 14 days are summarised, which is useful for school or a therapist.

Family

Add, edit or remove children, adjust stars by hand, open a child's day, and see the full star history.

Settings

Parent code for leaving kid mode, stars for finishing a routine, sounds, week start, themes and text size. Text size XL is a good default for younger children.

Where your data lives, and how to keep it safe

The app saves automatically to your browser's local storage on this device. It never sends anything anywhere. That means two things:

✓ Private by design

No account, no password, no email, no tracking. Closing the tab, restarting the computer, going offline — all fine, your data is still there when you come back.

⚠ Backups are yours to make

Clearing browser data, using a private/incognito window, or some "cleaner" apps can wipe local storage. So, once in a while (the app reminds you after 14 days of changes):

- 1 Settings → **Download backup**. A small .json file lands in your Downloads.
- 2 Move it somewhere you'll find it (a folder, or your cloud drive).
- 3 To restore — on this or any other device — Settings → **Restore a backup** and pick the file.

Encrypted backups

Settings → **Encrypted backup** locks the file with a passphrase you choose (AES-256). Perfect for cloud drives. There is no reset — if you lose the passphrase, nobody can open it, not even us.

Using the app in a private/incognito window will lose your data when the window closes. Use a normal window.

Sharing a home or a household? Each person opens the file in their own browser profile — data is kept separately.

Opening the app on each device

DEVICE	HOW
Windows	Keep the .html file in Documents. Double-click → opens in Edge or Chrome. Bookmark it. Optional: in Edge/Chrome, menu → "Install page as app" / "Create shortcut" → it gets its own window and icon.
Mac	Keep the file in Documents. Double-click → Safari (or right-click → Open With → Chrome). Bookmark it, or drag the address bar icon to the Dock.
Chromebook / Linux	Open the file in Chrome from the Files app. Bookmark it.
Android	Copy the file to your phone (email it to yourself, or use Google Drive → Download). Open it with Chrome from the Files app. Chrome menu : → Add to Home screen gives you an app icon.
iPhone / iPad	Open https://pablo96si.github.io/focusflow-kids/ in Safari. Tap the Share button (the square with an arrow) → Add to Home Screen → Add. You now have a Focus Flow icon that opens full-screen, works offline and keeps your data on your phone. The link only serves the app — nothing you type is sent to it. Please keep the link private; it is part of your purchase.

The web-app link works everywhere

The same link also works in Chrome on Android (menu : → Add to Home screen), in Edge/Chrome on Windows (Install app) and in Safari on Mac. Use the file or the link — whichever you prefer. Data is stored separately in each, so pick one and use a backup file to move between them.

Moving to a new device

Old device: Settings → Download backup. New device: open the app → Settings → Restore a backup. Two minutes.

Updates

Re-download from your Etsy purchases page any time. Open the new file, then Restore a backup if your data isn't already there.

Little questions, quick answers

Two devices, one child?

Each device keeps its own data. Pick one "home" device (a tablet in the kitchen works well) and use Settings → Download backup to copy to another.

My child can't read yet.

Steps are emoji-first; keep the words short. Text size XL and Kid mode make the pictures the main thing.

Can I take stars away?

Only by hand (Family → Adjust stars). The app never does it automatically — that's deliberate.

Does the timer make a sound?

A soft chime at zero and on each Done, if Sounds are on. Nothing alarming.

Something looks wrong on my screen.

Try a different browser (Chrome, Edge, Firefox and Safari are all supported), and make sure it's up to date. Then message us on Etsy with a screenshot — we answer.
