

FOCUS FLOW · TEACH

Quick Start Guide

from download to a planned week in 10 minutes

The screenshot displays the Focus Flow Teach app interface for a teacher named Sam. The dashboard is organized into several sections:

- Left Sidebar:** Contains navigation icons for Today, Week, Classes, To-do & marking (with a red notification bubble), Parent contact, Seating, and Settings.
- Header:** Greeting "Good morning, Sam." with a summary "3 lessons today · 3 due by tomorrow · 33 pieces to mark". It includes "Week" and "+ To-do" buttons.
- Lessons today (Fri, Sep 4):**
 - P1 7C Maths · Angles: assessment** (8:30 am, Quiet, 30 min, then swap & mark · M2)
 - P2 Year 11 Set 2 · Revision carousel** (9:30 am, 5 stations x 8 min · M4)
 - P4 9B Maths · Fractions: dividing** (11:45 am, Keep-change-flip · M4)
- Due today & tomorrow (All →):**
 - ☐ **Order protractors** (7C Maths, 5 min · overdue · yesterday)
 - ☐ **Email Mrs Cole re trip consent** (Form 8R, 10 min · due today)
 - ☐ **Print 30 worksheets for Friday** (9B Maths, 5 min · due tomorrow)
- Quick capture:** A text input field containing "print worksheets Year 8 tomorrow · marking 9B essays 1" and a "Park it" button. Below it, a list of tags: "Understands a class name, marking / prep / email, 20m, tomorrow or".
- Marking pile:**
 - Mark 9B fractions tests** (9B Maths, 1 h · 9/24 marked · due in 2 days, +5)
 - Mark Year 11 past paper Q1-6** (Year 11 Set 2, 45 min · 0/18 marked · due in 4 days, +5)
 - Note: "+5 at a time. A pile shrinks by fives, not by dread."
- Follow-ups due (Log →):**
 - Dev P.** (9B Maths, Homework not in for 2 weeks · promised today, Done)
 - Hugo S.** (Year 11 Set 2, Anxiety before exams · promised 2 days ago, Done)
- Quick note on a student:** A dropdown menu showing "9B Maths" and a text input field for "name".

Focus Flow Teach v1.0

a teacher planner for ADHD and neurodivergent teachers: a week of lessons at a glance, class lists with quick notes, a to-do list that knows about marking, parent contact log, seating charts, and a Sunday reset.

Hi. This will be quick.

Focus Flow Teach is a real app that lives in a single file. There is no account, no server and nothing to install — and nothing about your students goes anywhere. Your classes and their slots build the timetable; you plan each cell with a title, a plan and the materials to bring; next week you copy it and tweak. Marking shrinks by fives. Parent contact gets logged with the follow-up you promised. That's the whole method.

Everything you type stays on your device. Nobody can see it — not us, not anyone. The trade-off is that **you** are in charge of backups (see "Your data"). It's one tap; the app reminds you.

What's in your download

FILE	WHAT IT IS
Focus-Flow-Teach.html	The app. Keep this file somewhere safe (your Documents folder is perfect).
Focus-Flow-Teach-Quick-Start-Guide.pdf	This guide.
README.txt	The two-line version of this guide, with your iPhone link.

The 3-minute start

- 1 Unzip the download.** Windows: right-click → Extract All. Mac: double-click the ZIP.
- 2 Open Focus-Flow-Teach.html.** Double-click it. If it opens in the wrong program, right-click → Open with → Chrome / Edge / Firefox / Safari.
- 3 Bookmark it** (Ctrl/Cmd + D) so it's one click away from now on.
- 4 Answer 3 quick questions:** periods, classes, three to-dos. Or tap *"Explore with example data"* first.
- 5 Add slots to each class** (Classes → + slot). The Week screen fills itself.

Nothing you do here is permanent. Every delete has an Undo. "Start fresh" is always in Settings. Play.

Lessons, due, marking, follow-ups

Lessons today. Period, time, class, lesson title, the first line of your plan, a 📅 if there are materials to bring. The current lesson is lit. 🔍 opens the plan.

Due today & tomorrow from your to-dos.

Marking pile with +5 buttons — a pile shrinks by fives, not by dread. **Follow-ups due** from the parent contact log.

Quick capture. "marking 9B essays fri" → a marking to-do for 9B due Friday. It understands class names, prep / marking / admin / email / order, minutes, tomorrow and weekdays.

Quick note on a student. Class, name, one line. Five seconds, and it's kept with the class and the student. **Tomorrow** shows what's on so you can pack the bag tonight.

Press / anywhere to jump to Quick capture.

Copy, tweak, print

Periods down the side (edit them in Settings), Monday to Friday across. Cells are coloured by the class that has that slot. Tap a cell: class, lesson title, plan (the first line shows on Today), materials to bring or print, a different room if needed, and "Taught ✓".

Copy last week fills empty cells with last week's lessons, ready to tweak. Arrows (or [and] on a keyboard) move between weeks.  prints a clean timetable.

Sunday reset

Three questions, ten minutes: one lesson that worked, one thing to drop, one student to watch. Save, copy last week, go outside.

Who, when, where

A class has a name, subject, room, year, colour, slots (day + period) and students — paste the register, one name per line. Each card shows recent notes and links to seating and to-dos.

Student notes live with the class. Tap a name under "Students" to see everything you've written about them, plus any parent contact. This is the "she's been quiet since October" evidence you'd otherwise lose.

Seating

Pick a class, choose columns (4–8), tap a seat and then a name. **Shuffle** seats everyone at random; **Clear** empties the room;  prints it. Unseated students are listed underneath.

Marking by fives, follow-ups that nudge

To-do & marking

Kinds: prep, marking, admin, email, order / print, other. Each has a class, a due date and rough minutes. Marking to-dos also have a count of pieces; **+5** moves the bar, and the last +5 brings confetti. Filter by kind; overdue items show as a badge in the menu; Done keeps the last forty for Fridays.

Parent contact

Student, class, how (call, email, meeting, note home, app message), date, what it was about, what was said or agreed, and the date you promised to follow up by. Overdue follow-ups appear on Today until you tick them. Searchable by name or topic — useful when a parent says "we spoke in October".

Everything here stays on your device. Printing or a backup file is the only way anything leaves, and you're the one doing it.

Where your data lives, and how to keep it safe

The app saves automatically to your browser's local storage on this device. It never sends anything anywhere. That means two things:

✓ Private by design

No account, no password, no email, no tracking. Closing the tab, restarting the computer, going offline — all fine, your data is still there when you come back.

⚠ Backups are yours to make

Clearing browser data, using a private/incognito window, or some "cleaner" apps can wipe local storage. So, once in a while (the app reminds you after 14 days of changes):

- 1 Settings → **Download backup**. A small .json file lands in your Downloads.
- 2 Move it somewhere you'll find it (a folder, or your cloud drive).
- 3 To restore — on this or any other device — Settings → **Restore a backup** and pick the file.

Encrypted backups

Settings → **Encrypted backup** locks the file with a passphrase you choose (AES-256). Perfect for cloud drives. There is no reset — if you lose the passphrase, nobody can open it, not even us.

Using the app in a private/incognito window will lose your data when the window closes. Use a normal window.

Sharing a home or a household? Each person opens the file in their own browser profile — data is kept separately.

Opening the app on each device

DEVICE	HOW
Windows	Keep the .html file in Documents. Double-click → opens in Edge or Chrome. Bookmark it. Optional: in Edge/Chrome, menu → "Install page as app" / "Create shortcut" → it gets its own window and icon.
Mac	Keep the file in Documents. Double-click → Safari (or right-click → Open With → Chrome). Bookmark it, or drag the address bar icon to the Dock.
Chromebook / Linux	Open the file in Chrome from the Files app. Bookmark it.
Android	Copy the file to your phone (email it to yourself, or use Google Drive → Download). Open it with Chrome from the Files app. Chrome menu : → Add to Home screen gives you an app icon.
iPhone / iPad	Open https://pablo96si.github.io/focusflow-teach/ in Safari. Tap the Share button (the square with an arrow) → Add to Home Screen → Add. You now have a Focus Flow icon that opens full-screen, works offline and keeps your data on your phone. The link only serves the app — nothing you type is sent to it. Please keep the link private; it is part of your purchase.

The web-app link works everywhere

The same link also works in Chrome on Android (menu : → Add to Home screen), in Edge/Chrome on Windows (Install app) and in Safari on Mac. Use the file or the link — whichever you prefer. Data is stored separately in each, so pick one and use a backup file to move between them.

Moving to a new device

Old device: Settings → Download backup. New device: open the app → Settings → Restore a backup. Two minutes.

Updates

Re-download from your Etsy purchases page any time. Open the new file, then Restore a backup if your data isn't already there.

Little questions, quick answers

Our timetable is a two-week cycle.

Plan week A, then use Copy last week two weeks later (go forward two weeks, then back one and copy). Or add slots for both weeks and clear the ones you don't need.

Primary teacher with one class?

Add one class with your subjects as "periods" (Settings → Periods: Maths 09:00, English 10:00...). The week grid becomes your day grid.

GDPR / student data?

Nothing is uploaded anywhere; the file runs entirely in your browser. Use a work device, keep it locked, and use encrypted backups. Check your school's policy on storing student notes.

Can I share it with a colleague?

The licence is personal, but they can buy their own copy — and each copy keeps its own data.

Something looks wrong on my screen.

Try a different browser (Chrome, Edge, Firefox and Safari are all supported), and make sure it's up to date. Then message us on Etsy with a screenshot — we answer.

Licence
