

FOCUS FLOW · WORK

Quick Start Guide

from download to your Top 3 in 3 minutes

The screenshot displays the Focus Flow Work app interface for a user named Sam. The sidebar on the left contains a menu with options: Today, Projects, Focus, Meetings, Waiting for (with a red badge '2'), Wins, Week report, and Settings. The main content area is titled 'Good morning, Sam.' and shows a summary of the day's tasks: '3 of 3 picked · 2 meetings · 50 min focused · 2 to chase'. Below this, there are several sections: 'Right now' with a task 'Draft the 3-bullet launch summary for Priya' (Q4 launch, 25 min) and buttons '25 min on it', 'Done ✓', and 'Shrink it'; 'Top 3 today' with a list of tasks including 'Draft the 3-bullet launch summary for Priya', 'Reply to Sam about the pricing page copy', 'Review the two designer portfolios Jo sent', and 'Reproduce the empty-state bug on iOS'; 'Meetings today' with 'Weekly with Priya' and 'Design review'; 'Chase today' with 'Confirm launch date with legal' and 'Candidate availability for next week'; and 'Shutdown' with a checklist of tasks like 'Inbox parked', 'Tomorrow's Top 3 picked', and 'One win logged'. At the bottom, there is a 'Quick capture' section with a text input field and a 'Park it' button.

Focus Flow Work v1.0

an ADHD work planner: projects with next actions, meeting notes that turn into action items, a focus timer with body doubling, a waiting-for list, a wins log and a one-click "what I did this week" report.

Hi. This will be quick.

Focus Flow Work is a real app that lives in a single file. There is no account, no server and nothing to install. Every project gets one next action, every meeting turns into action items, every day ends with a shutdown ritual, and Friday's "what did I do this week" writes itself. That's the whole method.

Everything you type stays on your device. Nobody can see it — not us, not anyone. The trade-off is that **you** are in charge of backups (see "Your data"). It's one tap; the app reminds you.

What's in your download

FILE	WHAT IT IS
Focus-Flow-Work.html	The app. Keep this file somewhere safe (your Documents folder is perfect).
Focus-Flow-Work-Quick-Start-Guide.pdf	This guide.
README.txt	The two-line version of this guide, with your iPhone link.

The 3-minute start

- 1 Unzip the download.** Windows: right-click → Extract All. Mac: double-click the ZIP.
- 2 Open Focus-Flow-Work.html.** Double-click it. If it opens in the wrong program, right-click → Open with → Chrome / Edge / Firefox / Safari.
- 3 Bookmark it** (Ctrl/Cmd + D) so it's one click away from now on.
- 4 Answer 3 quick questions:** your name and role, your projects, and three actions on your mind. Or tap *"Explore with example data"* first.
- 5 Pick your Top 3** and press ► on "Right now". Everything you finish lands in the week report.

Nothing you do here is permanent. Every delete has an Undo. "Start fresh" is always in Settings. Play.

Right now, Top 3, meetings, shutdown

Right now. One action, not a list: your first Top 3 item, or the most urgent due one. ► starts a focus block on it. "Shrink it" opens the action so you can make it smaller.

Top 3. Three is the limit on purpose. Star actions anywhere, or use "Pick". Overdue items are listed underneath.

Quick capture. "email Priya re budget 15m @launch fri" → an action with 15 minutes, in the Q4 launch project, due Friday. "waiting Priya" sends it to Waiting for.

Meetings today shows open threads with that person from last time. **Chase today** lists who you've been waiting on too long. **Stalled projects** flags any project without a next action.

Shutdown. Three ticks: inbox parked, tomorrow's Top 3 picked, one win logged. The day ends when this is done, not when the list is.

Press / anywhere to jump to Quick capture.

The rule that keeps things moving

A project is anything that takes more than one step: "Q4 launch", "Hiring", "The audit". Three to six active projects is normal. Each card shows its **next action** big — the first open action by due date — with Focus and ✓ right there. Under it, up to four more actions and who you're waiting on.

No next action? The card shows a warning and Today lists the project under "Stalled". Add one tiny step and it's alive again.

Pause a project (||) to hide it from Today without losing anything. Mark it Done when it's done; "Show done" brings them back.

Actions

Verb first: "Draft the summary", "Book the call". Minutes, due date, energy level, and optionally a person you're waiting for. ★ puts it in today's Top 3, ► starts focus, ✎ edits.

The disc, the list, the Friday email

Focus

Pick an action, pick a length, press start. The disc shrinks as time passes — a visual timer for time blindness. **Body doubling** plays brown, pink, rain-like or white noise; headphones help in an open-plan office. When a block ends: log a win, take a break, or go again. Space starts and pauses; Shift+F hides everything else.

Wins

One line, any time: "unblocked Sam", "said no to a meeting". It's the list for performance reviews and for imposter syndrome. Finished focus blocks offer to log one.

Week report

Actions completed by project, meetings with how many of your items are done, focused time, wins, what you're still waiting on, and next week's next action per project. **Copy text** for the Friday update; **Print** for a clean page. Arrows move between weeks.

Where your data lives, and how to keep it safe

The app saves automatically to your browser's local storage on this device. It never sends anything anywhere. That means two things:

✓ Private by design

No account, no password, no email, no tracking. Closing the tab, restarting the computer, going offline — all fine, your data is still there when you come back.

⚠ Backups are yours to make

Clearing browser data, using a private/incognito window, or some "cleaner" apps can wipe local storage. So, once in a while (the app reminds you after 14 days of changes):

- 1 Settings → **Download backup**. A small .json file lands in your Downloads.
- 2 Move it somewhere you'll find it (a folder, or your cloud drive).
- 3 To restore — on this or any other device — Settings → **Restore a backup** and pick the file.

Encrypted backups

Settings → **Encrypted backup** locks the file with a passphrase you choose (AES-256). Perfect for cloud drives. There is no reset — if you lose the passphrase, nobody can open it, not even us.

Using the app in a private/incognito window will lose your data when the window closes. Use a normal window.

Sharing a home or a household? Each person opens the file in their own browser profile — data is kept separately.

Opening the app on each device

DEVICE	HOW
Windows	Keep the .html file in Documents. Double-click → opens in Edge or Chrome. Bookmark it. Optional: in Edge/Chrome, menu → "Install page as app" / "Create shortcut" → it gets its own window and icon.
Mac	Keep the file in Documents. Double-click → Safari (or right-click → Open With → Chrome). Bookmark it, or drag the address bar icon to the Dock.
Chromebook / Linux	Open the file in Chrome from the Files app. Bookmark it.
Android	Copy the file to your phone (email it to yourself, or use Google Drive → Download). Open it with Chrome from the Files app. Chrome menu : → Add to Home screen gives you an app icon.
iPhone / iPad	Open https://pablo96si.github.io/focusflow-work/ in Safari. Tap the Share button (the square with an arrow) → Add to Home Screen → Add. You now have a Focus Flow icon that opens full-screen, works offline and keeps your data on your phone. The link only serves the app — nothing you type is sent to it. Please keep the link private; it is part of your purchase.

The web-app link works everywhere

The same link also works in Chrome on Android (menu : → Add to Home screen), in Edge/Chrome on Windows (Install app) and in Safari on Mac. Use the file or the link — whichever you prefer. Data is stored separately in each, so pick one and use a backup file to move between them.

Moving to a new device

Old device: Settings → Download backup. New device: open the app → Settings → Restore a backup. Two minutes.

Updates

Re-download from your Etsy purchases page any time. Open the new file, then Restore a backup if your data isn't already there.

Little questions, quick answers

Can I use it alongside Jira / Asana / Outlook?

Yes — this is your personal layer: what you are doing next and what you are waiting for. Keep the team tools as they are; paste meeting notes here.

My company blocks unknown software.

It is a single HTML file that runs in the browser you already have, with no installation, no server and no network calls. Most IT teams are fine with that; the source is readable.

Work and personal in one file?

Add "Personal" as a project, or keep two copies of the file in two folders — each has its own data.

The noise doesn't play.

Browsers only start audio after you tap something. Tap the Body doubling button once, and check the device isn't muted.

Something looks wrong on my screen.

Try a different browser (Chrome, Edge, Firefox and Safari are all supported), and make sure it's up to date. Then message us on Etsy with a screenshot — we answer.
