

FOCUS FLOW · CHORES

Quick Start Guide

from download to whose turn it is in 3 minutes

The screenshot displays the Focus Flow Chores app interface. On the left is a sidebar with navigation options: Today (4), Week board, Chores, Rewards, Fairness, and Settings. The main content area is titled 'Good morning, The Estradas.' and shows '4 of 10 chores left today.' A '+ Chore' button is in the top right. The interface lists chores for four family members: Sam, Ana, Maya, and Leo. Each member's section shows their current points, a list of chores with icons, and an 'undo' button. For example, Sam has 146 points and chores like 'Dishwasher: unload' and 'Laundry: fold & put away'. Ana has 135 points and 'Nothing today.' Maya has 110 points and chores like 'Clear & wipe the table' and 'Walk the dog'. Leo has 118 points and chores like 'Set the table' and 'Dishwasher: load'. On the right, a 'This week' section shows a bar chart of points for each family member: Sam (11 pts), Ana (6 pts), Maya (10 pts), and Leo (9 pts). Below this is a 'Tomorrow' section listing upcoming chores: 'Make the bed' (anyone), 'Set the table' (Maya), 'Clear & wipe the table' (Leo), 'Dishwasher: load' (Sam), 'Dishwasher: unload' (Ana), and 'Recycling out' (Ana). A footer note states: 'The Estradas's chores. Your data lives only on this device. [Shortcuts ?](#)'

Focus Flow Chores v1.0

a family chore app that takes the nagging out of it: chores with a rhythm (daily, weekdays, weekly, monthly), fair rotation between people, points and allowance that add up by themselves, a rewards shop, and a week board on the fridge tablet.

Hi. This will be quick.

Focus Flow Chores is a real app that lives in a single file. There is no account, no server and nothing to install. Every chore has a rhythm and a rule about who does it; the app works out whose turn it is, counts points when it's done, and shows fairness in minutes. Put the board on the fridge tablet and the arguments get shorter. That's the whole method.

Everything you type stays on your device. Nobody can see it — not us, not anyone. The trade-off is that **you** are in charge of backups (see "Your data"). It's one tap; the app reminds you.

What's in your download

FILE	WHAT IT IS
Focus-Flow-Chores.html	The app. Keep this file somewhere safe (your Documents folder is perfect).
Focus-Flow-Chores-Quick-Start-Guide.pdf	This guide.
README.txt	The two-line version of this guide, with your iPhone link.

The 3-minute start

- 1 Unzip the download.** Windows: right-click → Extract All. Mac: double-click the ZIP.
- 2 Open Focus-Flow-Chores.html.** Double-click it. If it opens in the wrong program, right-click → Open with → Chrome / Edge / Firefox / Safari.
- 3 Bookmark it** (Ctrl/Cmd + D) so it's one click away from now on.
- 4 Answer 3 quick questions:** who lives here, which of 22 common chores apply, points or pocket money. Or tap *"Explore with example data"* first.
- 5 Each day, open Today.** Each person sees their chores. Done ✓ gives points. Undo if a small hand pressed it early.

Nothing you do here is permanent. Every delete has an Undo. "Start fresh" is always in Settings. Play.

TODAY

Whose turn, one tap

A card per person: today's chores, points and minutes, a Done ✓ button, their balance and streak. **Anyone** chores (make the bed, put the shopping away) show a button per person: tap who did it. The side column shows **points this week** and **tomorrow**, so nobody gets surprised by bathroom day.

Adults are people too. Put your own chores in and let the kids see the board — fairness works better than authority.

CHORES

Rhythm and rule

A chore has an emoji, a name, a room, a rhythm — every day, weekdays, weekly on a chosen day, monthly on a date — points, minutes, and a rule: one person, **everyone in turn**, or **anyone**.

A rotation pool limits who's in the loop (kids only for feeding the pet, adults for the bathroom). The rotation offset shifts whose turn it is if the app's order doesn't match reality.

Daily chores rotate every day, weekly chores every week, monthly chores every month.

For the fridge tablet

People down the side, days across, today highlighted. Every chip is a chore; tap to mark it done, tap again to undo. Arrows go back and forward a week. Points per person for the week sit under each name.

On a tablet, open the private web-app link and Add to Home Screen. It runs full-screen and offline, and the data stays on that tablet.

Points buy rewards. Minutes show fairness.

Rewards: a shop with six starters (ice cream trip, pick the film, stay up later...) and your own. Each person's balance carries over; rewards are greyed until affordable. In **allowance mode** the balance shows as money (points × value) and "Paid out" resets it.

Fairness: minutes per person this week with percentages, points over the last four weeks, and the most-skipped chores in 28 days. A chore skipped every week is the wrong chore, the wrong day, or the wrong person. Change one thing.

Where your data lives, and how to keep it safe

The app saves automatically to your browser's local storage on this device. It never sends anything anywhere. That means two things:

✓ Private by design

No account, no password, no email, no tracking. Closing the tab, restarting the computer, going offline — all fine, your data is still there when you come back.

⚠ Backups are yours to make

Clearing browser data, using a private/incognito window, or some "cleaner" apps can wipe local storage. So, once in a while (the app reminds you after 14 days of changes):

- 1 Settings → **Download backup**. A small .json file lands in your Downloads.
- 2 Move it somewhere you'll find it (a folder, or your cloud drive).
- 3 To restore — on this or any other device — Settings → **Restore a backup** and pick the file.

Encrypted backups

Settings → **Encrypted backup** locks the file with a passphrase you choose (AES-256). Perfect for cloud drives. There is no reset — if you lose the passphrase, nobody can open it, not even us.

Using the app in a private/incognito window will lose your data when the window closes. Use a normal window.

Sharing a home or a household? Each person opens the file in their own browser profile — data is kept separately.

Opening the app on each device

DEVICE	HOW
Windows	Keep the .html file in Documents. Double-click → opens in Edge or Chrome. Bookmark it. Optional: in Edge/Chrome, menu → "Install page as app" / "Create shortcut" → it gets its own window and icon.
Mac	Keep the file in Documents. Double-click → Safari (or right-click → Open With → Chrome). Bookmark it, or drag the address bar icon to the Dock.
Chromebook / Linux	Open the file in Chrome from the Files app. Bookmark it.
Android	Copy the file to your phone (email it to yourself, or use Google Drive → Download). Open it with Chrome from the Files app. Chrome menu : → Add to Home screen gives you an app icon.
iPhone / iPad	Open https://pablo96si.github.io/focusflow-chores/ in Safari. Tap the Share button (the square with an arrow) → Add to Home Screen → Add. You now have a Focus Flow icon that opens full-screen, works offline and keeps your data on your phone. The link only serves the app — nothing you type is sent to it. Please keep the link private; it is part of your purchase.

The web-app link works everywhere

The same link also works in Chrome on Android (menu : → Add to Home screen), in Edge/Chrome on Windows (Install app) and in Safari on Mac. Use the file or the link — whichever you prefer. Data is stored separately in each, so pick one and use a backup file to move between them.

Moving to a new device

Old device: Settings → Download backup. New device: open the app → Settings → Restore a backup. Two minutes.

Updates

Re-download from your Etsy purchases page any time. Open the new file, then Restore a backup if your data isn't already there.

Little questions, quick answers

Does every person need their own phone?

No. One tablet or laptop in the kitchen is the classic setup. Each person's card is right there. Backups move the data between devices when you want.

Can adults be in it?

Yes, and they should. Fairness is measured in minutes across everyone, which is the whole point.

Pocket money instead of rewards?

Settings → Points are: allowance. Set a value per point. Rewards then show as money, and "Paid out" clears the balance when you hand it over.

A chore that's twice a week?

Add it twice with two different days (e.g. "Rubbish out — Tue" and "Rubbish out — Fri"). They rotate independently.

Something looks wrong on my screen.

Try a different browser (Chrome, Edge, Firefox and Safari are all supported), and make sure it's up to date. Then message us on Etsy with a screenshot — we answer.
