Sam's ledger

Your data lives only on this device. [Shortcuts ?](#)

Focus Flow Ledger v1.0

simple bookkeeping for freelancers and side hustles: income and expenses in ten seconds, categories that match a tax return, a tax set-aside that updates itself, quarterly and yearly summaries, mileage, and a CSV export for the accountant.

Hi. This will be quick.

Focus Flow Ledger is a real app that lives in a single file. There is no account, no server, no bank connection and nothing to install. Income and expenses take ten seconds each, categories match a tax return, the tax pot tells you what should be set aside, and the year report prints or exports for the accountant. That's the whole method. It is a record-keeper, not tax advice.

Everything you type stays on your device. Nobody can see it — not us, not anyone. The trade-off is that **you** are in charge of backups (see "Your data"). It's one tap; the app reminds you.

What's in your download

FILE	WHAT IT IS
Focus-Flow-Ledger.html	The app. Keep this file somewhere safe (your Documents folder is perfect).
Focus-Flow-Ledger-Quick-Start-Guide.pdf	This guide.
README.txt	The two-line version of this guide, with your iPhone link.

The 3-minute start

- 1 Unzip the download.** Windows: right-click → Extract All. Mac: double-click the ZIP.
- 2 Open Focus-Flow-Ledger.html.** Double-click it. If it opens in the wrong program, right-click → Open with → Chrome / Edge / Firefox / Safari.
- 3 Bookmark it** (Ctrl/Cmd + D) so it's one click away from now on.
- 4 Answer 3 quick questions:** business name and currency, the share to set aside, your last payment and purchase. Or tap *"Explore with example data"* first.
- 5 Every payment in: 10 seconds (i).** Every purchase: 10 seconds (**e**). Move the % to your tax account and log it.

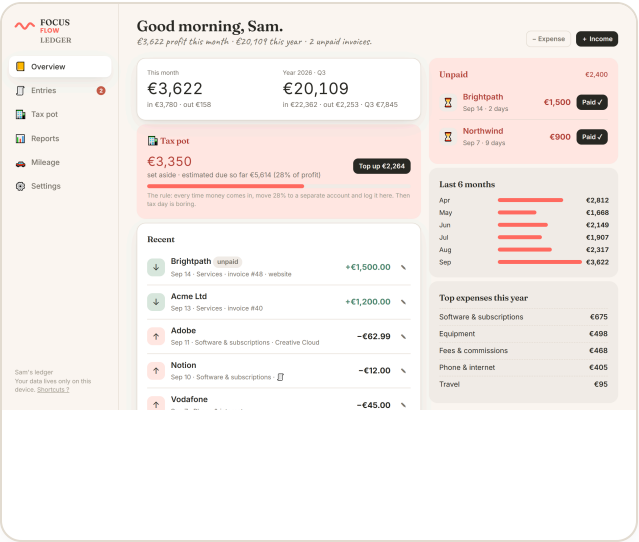

Nothing you do here is permanent. Every delete has an Undo. "Start fresh" is always in Settings. Play.

Month, year, pot, unpaid

This month and this year profit, with in/out totals and the current quarter. **Tax pot:** what you've set aside versus the estimated tax due so far, with a "Top up" button that pre-fills the difference. **Recent** entries. **Unpaid** invoices with days outstanding and a "Paid ✓" button. **Last 6 months** of profit as bars, and the top expense categories this year.

The habit that makes it work: when money lands, move your % to a separate account and log the transfer. Then April is a button.

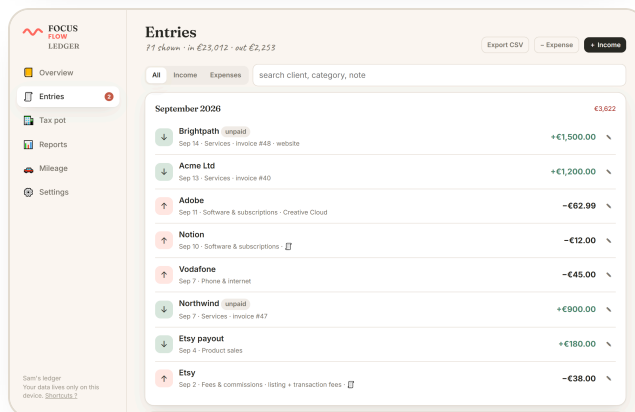

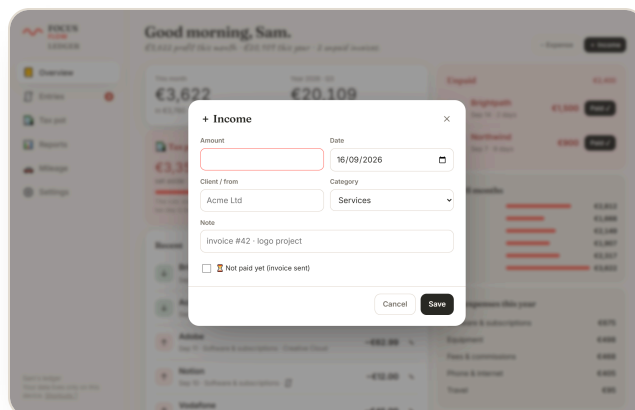

ENTRIES

Ten seconds, honestly

Income: amount, date, client, category (services, product sales, commissions, royalties, refunds, other), note, and "not paid yet" if you've only sent the invoice. Expense: amount, date, paid to, category (software, equipment, office, phone, travel, meals, marketing, fees, professional services, insurance, training, bank charges, workspace, materials, other), note, and "receipt kept".

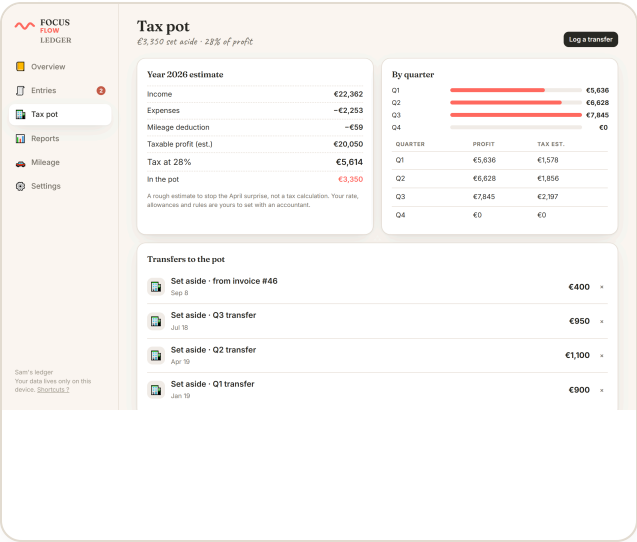

The list is grouped by month with the month's profit, filterable by income/expense, searchable by client, category or note. **Export CSV** for a spreadsheet or the accountant.

Rough on purpose, honest about it

Set a percentage in Settings (25–30% is a common safe share for income tax plus contributions — confirm with an accountant). The Tax screen shows the year's income, expenses, mileage deduction, taxable profit estimate, tax at your rate, and what is actually in the pot. **By quarter**: profit and estimated tax per quarter. **Transfers**: every move into the pot (or out, when you pay the bill).

It is an estimate to stop the April surprise, not a tax calculation. Allowances, thresholds and rules are yours to set with a professional.

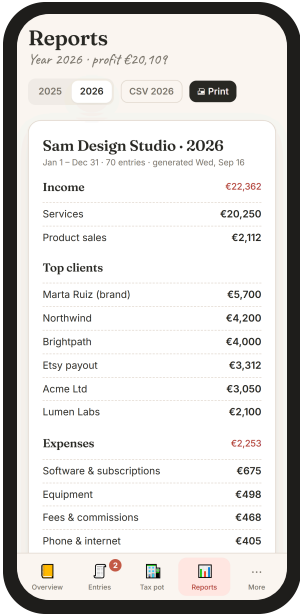

One page for the accountant

Reports: pick a year. Income by category, top clients, expenses by category, mileage deduction, profit, tax set aside, and how many expenses have a receipt on file. **Print** a clean page or **CSV** that year's entries.

Mileage: date, where, why, distance, round trip. Deductible at your per-km or per-mile rate; the total feeds the tax estimate and the report. Most tax offices accept a log like this.

In the last week of the year: Reports → print, CSV → email. Done before the accountant asks.

Where your data lives, and how to keep it safe

The app saves automatically to your browser's local storage on this device. It never sends anything anywhere. That means two things:

✓ Private by design

No account, no password, no email, no tracking. Closing the tab, restarting the computer, going offline — all fine, your data is still there when you come back.

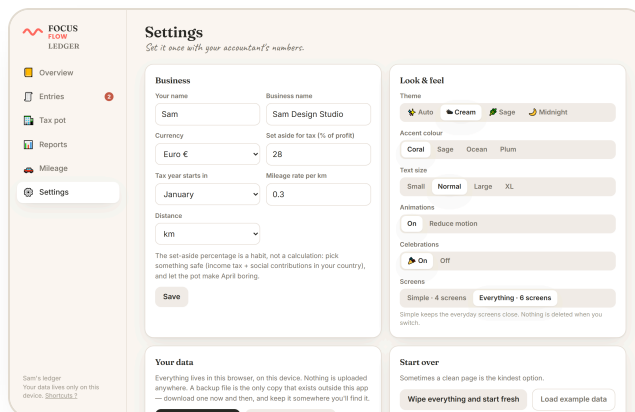

⚠ Backups are yours to make

Clearing browser data, using a private/incognito window, or some "cleaner" apps can wipe local storage. So, once in a while (the app reminds you after 14 days of changes):

- 1 Settings → **Download backup**. A small .json file lands in your Downloads.
- 2 Move it somewhere you'll find it (a folder, or your cloud drive).
- 3 To restore — on this or any other device — Settings → **Restore a backup** and pick the file.

Encrypted backups

Settings → **Encrypted backup** locks the file with a passphrase you choose (AES-256). Perfect for cloud drives. There is no reset — if you lose the passphrase, nobody can open it, not even us.

Using the app in a private/incognito window will lose your data when the window closes. Use a normal window.

Sharing a home or a household? Each person opens the file in their own browser profile — data is kept separately.

Opening the app on each device

DEVICE	HOW
Windows	Keep the .html file in Documents. Double-click → opens in Edge or Chrome. Bookmark it. Optional: in Edge/Chrome, menu → "Install page as app" / "Create shortcut" → it gets its own window and icon.
Mac	Keep the file in Documents. Double-click → Safari (or right-click → Open With → Chrome). Bookmark it, or drag the address bar icon to the Dock.
Chromebook / Linux	Open the file in Chrome from the Files app. Bookmark it.
Android	Copy the file to your phone (email it to yourself, or use Google Drive → Download). Open it with Chrome from the Files app. Chrome menu : → Add to Home screen gives you an app icon.
iPhone / iPad	Open https://pablo96si.github.io/focusflow-ledger/ in Safari. Tap the Share button (the square with an arrow) → Add to Home Screen → Add. You now have a Focus Flow icon that opens full-screen, works offline and keeps your data on your phone. The link only serves the app — nothing you type is sent to it. Please keep the link private; it is part of your purchase.

The web-app link works everywhere

The same link also works in Chrome on Android (menu : → Add to Home screen), in Edge/Chrome on Windows (Install app) and in Safari on Mac. Use the file or the link — whichever you prefer. Data is stored separately in each, so pick one and use a backup file to move between them.

Moving to a new device

Old device: Settings → Download backup. New device: open the app → Settings → Restore a backup. Two minutes.

Updates

Re-download from your Etsy purchases page any time. Open the new file, then Restore a backup if your data isn't already there.

Little questions, quick answers

Is this accounting software?

It is a ledger — a clean record of what came in and went out, categorised, with a tax set-aside habit and a year report. For VAT, payroll or filing, hand the CSV to an accountant or a filing tool.

Tax year isn't January?

Settings → tax year starts in (e.g. April for the UK). Quarters and reports follow it.

Multiple businesses?

Keep one file per business — two copies in two folders, each with its own data.

Does it connect to my bank?

No, on purpose. You type it, in ten seconds, and it stays on this device.

Something looks wrong on my screen.

Try a different browser (Chrome, Edge, Firefox and Safari are all supported), and make sure it's up to date. Then message us on Etsy with a screenshot — we answer.
