Sam Reyes's clients

Your data lives only on this device. [Shortcuts ?](#)

Focus Flow Clients v1.0

a client & invoice tracker for ADHD freelancers: clients with next actions, projects, time tracking, invoices with paid / due / overdue and a polite nudge, income overview, and a follow-up list so nobody falls through the cracks.

FOCUS FLOW

Hi. This will be quick.

Focus Flow Clients is a real app that lives in a single file. There is no account, no server, nothing to install and nothing per month. Every client gets one next action, every project moves from quoted to invoiced, every invoice has a clock and a polite nudge, and Income tells you the truth about your hourly rate. That's the whole method.

Everything you type stays on your device. Nobody can see it — not us, not anyone. The trade-off is that **you** are in charge of backups (see "Your data"). It's one tap; the app reminds you.

What's in your download

FILE	WHAT IT IS
Focus-Flow-Clients.html	The app. Keep this file somewhere safe (your Documents folder is perfect).
Focus-Flow-Clients-Quick-Start-Guide.pdf	This guide.
README.txt	The two-line version of this guide, with your iPhone link.

The 3-minute start

- 1 Unzip the download.** Windows: right-click → Extract All. Mac: double-click the ZIP.
- 2 Open Focus-Flow-Clients.html.** Double-click it. If it opens in the wrong program, right-click → Open with → Chrome / Edge / Firefox / Safari.
- 3 Bookmark it** (Ctrl/Cmd + D) so it's one click away from now on.
- 4 Answer 3 quick questions:** rate, terms and goal; your clients; anything unpaid. Or tap *"Explore with example data"* first.
- 5 Add a next action for each client.** That's the whole system — nobody goes quiet by accident.

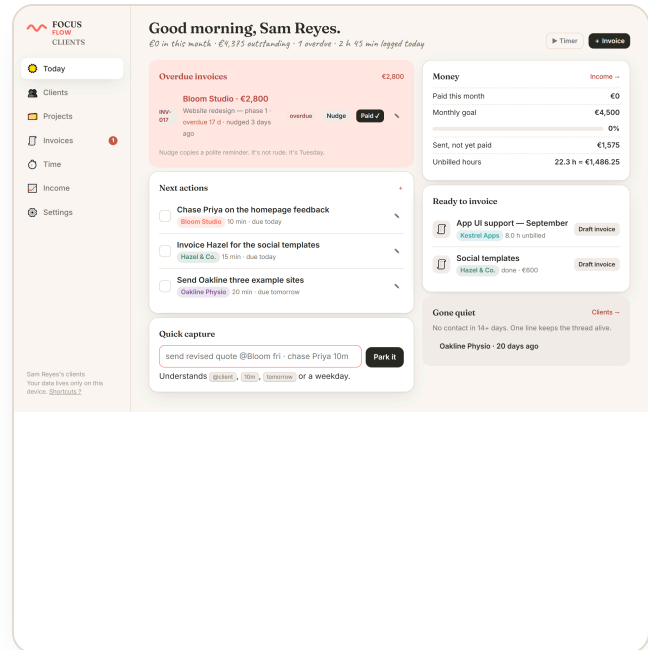

Nothing you do here is permanent. Every delete has an Undo. "Start fresh" is always in Settings. Play.

Overdue, next actions, money, gone quiet

Overdue invoices sit at the top when there are any, each with a Nudge and a Paid button. Then **next actions** due today or tomorrow, and a **quick capture** box ("send revised quote @Bloom fri").

Money. Paid this month against your goal, sent-but-unpaid, and unbilled hours with what they're worth. **Ready to invoice** lists done projects and hourly projects with 4+ unbilled hours. **Gone quiet** flags active clients and leads with no logged contact in 14 days — one line keeps the thread alive.

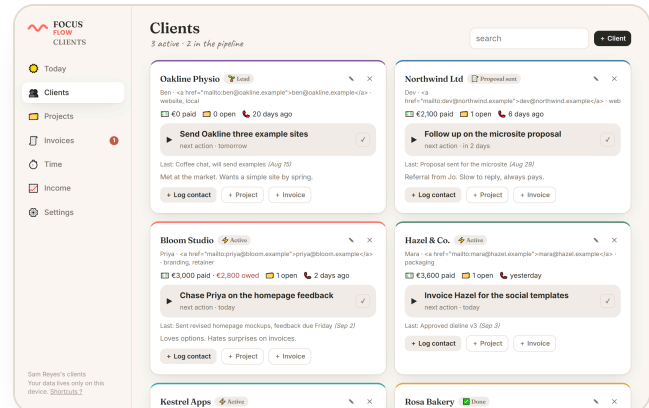

Press / anywhere to jump to Quick capture.

A next action each, a small board

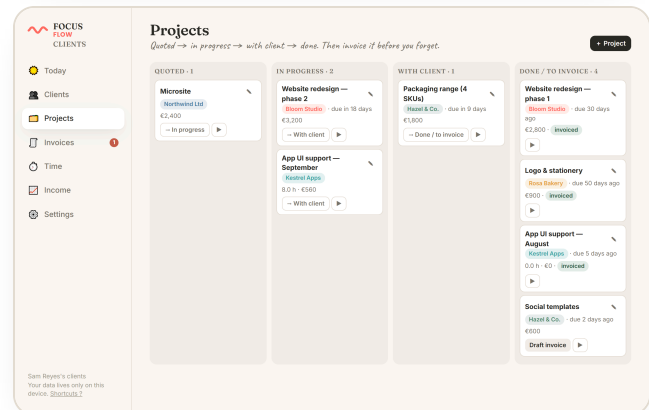

Clients

Stage (lead, proposal, active, paused, done, lost), contact, email, tags, colour and notes — how they like to work, what they hate, who referred them. Each card shows money paid and owed, open projects, when you last spoke, the next action with a ✓, and the last logged contact. **Log contact** is one line with an optional next action attached.

Projects

A four-column board: quoted → in progress → with client → done / to invoice. Fixed price or hourly with a rate. ► starts a timer block on the project; "→" moves it along; **Draft invoice** appears when it's done. Hourly projects show hours and value as you go.

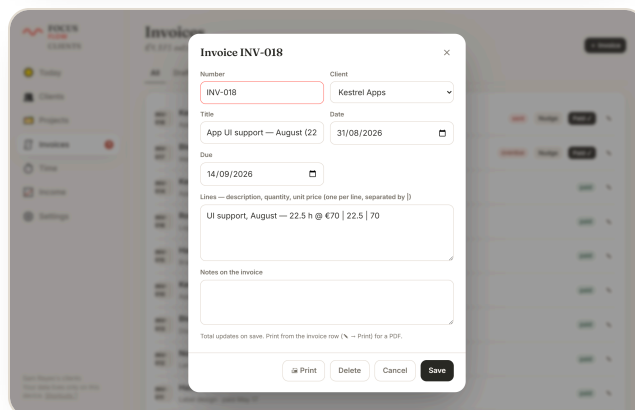

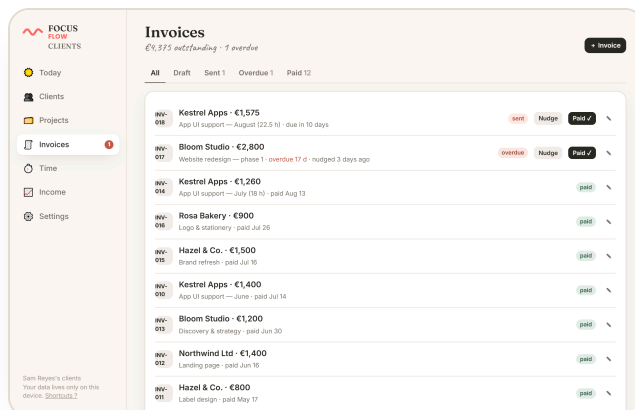

INVOICES

Draft, sent, overdue, paid

Draft from a done project (one tap: the fixed price or the unbilled hours become the line) or from scratch. Number, client, title, date, due, lines as "description | qty | price", notes. **Print** opens a clean invoice with your business name and footer (bank details, VAT number) ready for Save as PDF.

Sent starts the clock using your payment terms. On the due date it turns **overdue** and moves to the top of Today. **Nudge** copies a polite reminder to your clipboard and notes the date so you don't nudge twice. **Paid** records today, with confetti — you earned it.

Filter by status, export CSV for your accountant.

Hours that become money, and the truth about rates

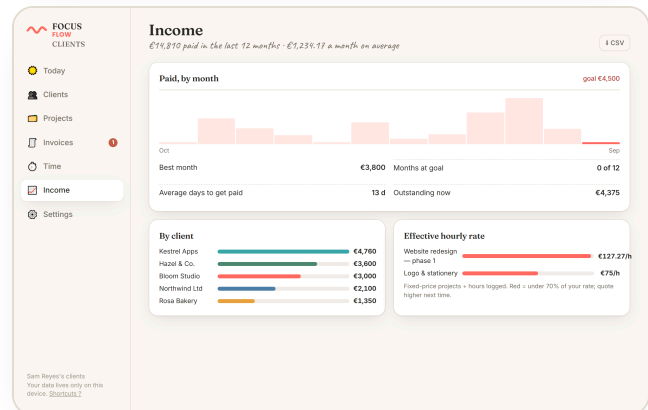

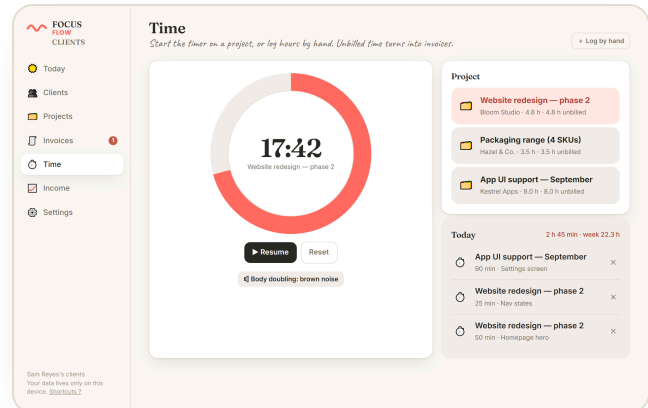

Time

Pick a project, start the timer (15 / 25 / 50 / 90 or custom) with optional body-doubling noise. Every finished block logs itself to the project; or log hours by hand. Entries stay "unbilled" until an invoice picks them up.

Income

Paid by month for the last twelve months with your goal as a line, best month, months at goal, average days to get paid, outstanding now. **By client** — with a warning when one client is more than half your income. **Effective hourly rate** divides fixed-price projects by the hours you logged; red means under 70% of your rate, so quote higher next time.

This is a tracker, not accounting software.
Export CSV for tax time and keep your accountant happy.

Where your data lives, and how to keep it safe

The app saves automatically to your browser's local storage on this device. It never sends anything anywhere. That means two things:

✓ Private by design

No account, no password, no email, no tracking. Closing the tab, restarting the computer, going offline — all fine, your data is still there when you come back.

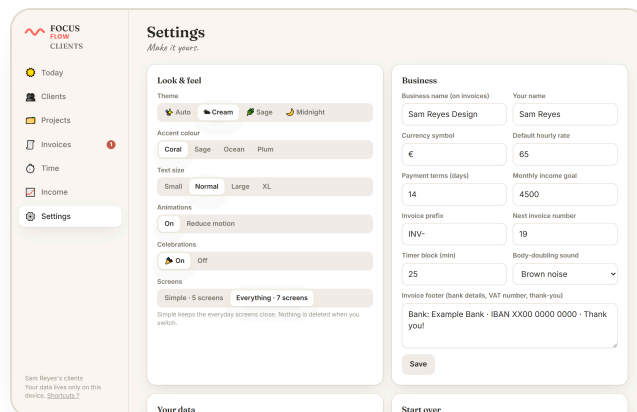

⚠ Backups are yours to make

Clearing browser data, using a private/incognito window, or some "cleaner" apps can wipe local storage. So, once in a while (the app reminds you after 14 days of changes):

- 1 Settings → **Download backup**. A small .json file lands in your Downloads.
- 2 Move it somewhere you'll find it (a folder, or your cloud drive).
- 3 To restore — on this or any other device — Settings → **Restore a backup** and pick the file.

Encrypted backups

Settings → **Encrypted backup** locks the file with a passphrase you choose (AES-256). Perfect for cloud drives. There is no reset — if you lose the passphrase, nobody can open it, not even us.

Using the app in a private/incognito window will lose your data when the window closes. Use a normal window.

Sharing a home or a household? Each person opens the file in their own browser profile — data is kept separately.

Opening the app on each device

DEVICE	HOW
Windows	Keep the .html file in Documents. Double-click → opens in Edge or Chrome. Bookmark it. Optional: in Edge/Chrome, menu → "Install page as app" / "Create shortcut" → it gets its own window and icon.
Mac	Keep the file in Documents. Double-click → Safari (or right-click → Open With → Chrome). Bookmark it, or drag the address bar icon to the Dock.
Chromebook / Linux	Open the file in Chrome from the Files app. Bookmark it.
Android	Copy the file to your phone (email it to yourself, or use Google Drive → Download). Open it with Chrome from the Files app. Chrome menu : → Add to Home screen gives you an app icon.
iPhone / iPad	Open https://pablo96si.github.io/focusflow-clients/ in Safari. Tap the Share button (the square with an arrow) → Add to Home Screen → Add. You now have a Focus Flow icon that opens full-screen, works offline and keeps your data on your phone. The link only serves the app — nothing you type is sent to it. Please keep the link private; it is part of your purchase.

The web-app link works everywhere

The same link also works in Chrome on Android (menu : → Add to Home screen), in Edge/Chrome on Windows (Install app) and in Safari on Mac. Use the file or the link — whichever you prefer. Data is stored separately in each, so pick one and use a backup file to move between them.

Moving to a new device

Old device: Settings → Download backup. New device: open the app → Settings → Restore a backup. Two minutes.

Updates

Re-download from your Etsy purchases page any time. Open the new file, then Restore a backup if your data isn't already there.

Little questions, quick answers

Does it send invoices?

No — nothing leaves your device. Print to PDF and attach it to your own email, or paste the lines into your invoicing tool. Nudge copies the reminder text.

VAT / sales tax?

Add it as a line ("VAT 20% | 1 | 240") and put your VAT number in the invoice footer in Settings.

Multiple currencies?

The symbol is a label in Settings. For two currencies, keep two copies of the file.

Can I import my old invoices?

Add the paid ones you want in the charts by hand (number, client, amount, paid date). Ten minutes for a year.

Something looks wrong on my screen.

Try a different browser (Chrome, Edge, Firefox and Safari are all supported), and make sure it's up to date. Then message us on Etsy with a screenshot — we answer.
