

FOCUS FLOW · CONTENT

Quick Start Guide

from download to a working content system in 3 minutes

The screenshot displays the Focus Flow Content app interface for a user named Sam. The interface is organized into several sections:

- Left Sidebar:** Contains navigation icons and labels for Today, Ideas, Pipeline, Calendar, Batch, Stats, and Settings.
- Header:** Greeting "Good morning, Sam." with a summary "3 of 3 posted this week · 1 to post today. 8 ideas waiting." and buttons for Batch and Idea.
- Post today:** A section showing a post titled "Why I stopped batching on Sundays" with a "Posted" button and details: "Scheduled · short · Behind the scenes · today".
- Next 7 days:** A list of upcoming content items:
 - "Newsletter #41: the boring system that works" (Ready · email · ADHD & work · tomorrow, Newsletter)
 - "The 3 tools I actually use (not the 30 I've tried)" (Scheduled · carousel · Tools I use · in 2 days, Instagram)
 - "Desk tour but honest" (Drafting · short · Behind the scenes · in 4 days, Shorts / Reels)
 - "How do you stay consistent with ADHD?" — answer (Drafting · video · ADHD & work · in 6 days, YouTube)
- Ideas inbox:** A section with 8 ideas. One idea is visible: "a thought, a hook, half a sentence — capture now, judge" with a "Capture" button. Another idea is "What 'consistency' means when your brain has weather" with a "Start drafting" button.
- This week:** A calendar view showing "3 of 3 posted" with a progress bar and a weekly consistency chart.
- Pipeline:** A summary of content stages: Idea (8), Drafting (3), Ready (2), Scheduled (2), and Posted (19). It includes a note: "A healthy pipeline: a few ready, a few drafting, lots of ideas."
- Batching:** A section showing "2 h 10 min of batching in the last 7 days." with a "Start one" button.

Focus Flow Content v1.0

a content planner for creators with ADHD brains: an idea inbox that never loses a thought, a pipeline from idea to posted, a weekly calendar per platform, batching sessions with a timer, a repurpose helper and honest stats.

Hi. This will be quick.

Focus Flow Content is a real app that lives in a single file. There is no account, no server and nothing to install. Ideas go into an inbox the moment you have them; the good ones move through a pipeline — drafting, ready, scheduled, posted; the calendar shows the week per platform; a batching timer gets the making done in one sitting; and the stats count a weekly target, never a daily streak. That's the whole method.

Everything you type stays on your device. Nobody can see it — not us, not anyone. The trade-off is that **you** are in charge of backups (see "Your data"). It's one tap; the app reminds you.

What's in your download

FILE	WHAT IT IS
Focus-Flow-Content.html	The app. Keep this file somewhere safe (your Documents folder is perfect).
Focus-Flow-Content-Quick-Start-Guide.pdf	This guide.
README.txt	The two-line version of this guide, with your iPhone link.

The 3-minute start

- 1 Unzip the download.** Windows: right-click → Extract All. Mac: double-click the ZIP.
- 2 Open Focus-Flow-Content.html.** Double-click it. If it opens in the wrong program, right-click → Open with → Chrome / Edge / Firefox / Safari.
- 3 Bookmark it** (Ctrl/Cmd + D) so it's one click away from now on.
- 4 Answer 3 quick questions:** your platforms and weekly target, your pillars, three ideas. Or tap *"Explore with example data"* first.
- 5 Open Today each morning.** Post what it says. Capture anything new with **n**. Batch once a week.

Nothing you do here is permanent. Every delete has an Undo. "Start fresh" is always in Settings. Play.

Post, next 7 days, the inbox

Post today lists what's scheduled for today with a **Posted** 🚀 button. If nothing is scheduled but pieces are ready, it offers to schedule one for today. **Slipped** pieces — scheduled in the past, not posted — sit underneath with two buttons: today, or posted ✓. Late content is still content.

Next 7 days shows what's coming, per platform. **Ideas inbox** has a capture field and the top five ideas (sparked ones first) with a "Start drafting" button.

This week: posted against your target, with the seven days (dark = posted that day, ·2 = scheduled). **Pipeline** counts and a one-line health check. **Batching** minutes in the last seven days.

Press **n** anywhere to capture an idea. Judge it later.

Inbox first, then the board

Ideas

Everything you think of goes here — a hook, a question someone asked, half a sentence. Tap the bulb to spark 💡 the ones that excite you; they float to the top. Filter by pillar; search.

Pillars are the 3–5 themes you always return to; the bars show which one is starving. **Stuck?** Six prompts that always produce something.

Pipeline

Four columns: Ideas, Drafting, Ready, Scheduled. Each card shows platform, format, date and the **next tiny step** ("write 3 hooks", "film the intro"). ← → move a piece; ⌚ starts a batch on it. Opening a piece shows the hook, notes and "Move to" chips. Posted pieces leave the board and count on Stats.

Fixed slots, one sitting

Calendar

A week grid: one row per platform, one column per day. Tap **+** in a slot to schedule a piece there (a new one, or pick from **Ready** below). Posted pieces show dark. The trick that survives bad weeks: fixed slots — Tuesday newsletter, Wednesday and Friday Reels — filled from Ready. When a week goes wrong, the slots stay; you skip one.

Batch

A timer with 25 / 45 / 60 / 90-minute presets, a shrinking disc and body-doubling noise. Pick a piece (or a task like "Film 3 shorts"), start, stop when it chimes. The finish dialog lets you mark the piece's new stage in one tap and logs the session. Same format per session: all filming, or all writing — switching costs twenty minutes each time.

What worked, without shame

Posted per week for the last eight weeks against your target, and how many weeks hit it. **By platform · by pillar** — and which pillar you're starving. **What worked:** open a posted piece and give it a gut rating, 1–5; the best rise here and the average per pillar appears. **Batching:** sessions and minutes, ideas captured, ideas → posted conversion (a low number is normal — that's what an inbox is for).

Repurpose. Every posted piece suggests five follow-ups based on its format — "3 Shorts from the best moments", "Carousel: the 5 key points", "Newsletter: the story behind it". Tick the ones you did, or **make it a piece** to drop one straight into the inbox.

Set the weekly target you'd hit on a bad week.
Two good pieces beat seven rushed ones —
the algorithm can't tell you're tired.

Where your data lives, and how to keep it safe

The app saves automatically to your browser's local storage on this device. It never sends anything anywhere. That means two things:

✓ Private by design

No account, no password, no email, no tracking. Closing the tab, restarting the computer, going offline — all fine, your data is still there when you come back.

⚠ Backups are yours to make

Clearing browser data, using a private/incognito window, or some "cleaner" apps can wipe local storage. So, once in a while (the app reminds you after 14 days of changes):

- 1 Settings → **Download backup**. A small .json file lands in your Downloads.
- 2 Move it somewhere you'll find it (a folder, or your cloud drive).
- 3 To restore — on this or any other device — Settings → **Restore a backup** and pick the file.

Encrypted backups

Settings → **Encrypted backup** locks the file with a passphrase you choose (AES-256). Perfect for cloud drives. There is no reset — if you lose the passphrase, nobody can open it, not even us.

Using the app in a private/incognito window will lose your data when the window closes. Use a normal window.

Sharing a home or a household? Each person opens the file in their own browser profile — data is kept separately.

Opening the app on each device

DEVICE	HOW
Windows	Keep the .html file in Documents. Double-click → opens in Edge or Chrome. Bookmark it. Optional: in Edge/Chrome, menu → "Install page as app" / "Create shortcut" → it gets its own window and icon.
Mac	Keep the file in Documents. Double-click → Safari (or right-click → Open With → Chrome). Bookmark it, or drag the address bar icon to the Dock.
Chromebook / Linux	Open the file in Chrome from the Files app. Bookmark it.
Android	Copy the file to your phone (email it to yourself, or use Google Drive → Download). Open it with Chrome from the Files app. Chrome menu : → Add to Home screen gives you an app icon.
iPhone / iPad	Open https://pablo96si.github.io/focusflow-content/ in Safari. Tap the Share button (the square with an arrow) → Add to Home Screen → Add. You now have a Focus Flow icon that opens full-screen, works offline and keeps your data on your phone. The link only serves the app — nothing you type is sent to it. Please keep the link private; it is part of your purchase.

The web-app link works everywhere

The same link also works in Chrome on Android (menu : → Add to Home screen), in Edge/Chrome on Windows (Install app) and in Safari on Mac. Use the file or the link — whichever you prefer. Data is stored separately in each, so pick one and use a backup file to move between them.

Moving to a new device

Old device: Settings → Download backup. New device: open the app → Settings → Restore a backup. Two minutes.

Updates

Re-download from your Etsy purchases page any time. Open the new file, then Restore a backup if your data isn't already there.

Little questions, quick answers

Does it post for me?

No — it is a planner, not a scheduler. You post where you post; you tap "Posted 🚀" here.

Can I add my own platform?

Pick "Other", or use one of the twelve. Platforms you don't tick in Settings stay hidden.

Analytics?

Your own 1–5 gut rating per piece. It is faster than dashboards and, after ten pieces, surprisingly accurate about what to make more of.

Two people, one file?

Keep the file on a shared device, or keep two copies in two folders — each has its own data.

Something looks wrong on my screen.

Try a different browser (Chrome, Edge, Firefox and Safari are all supported), and make sure it's up to date. Then message us on Etsy with a screenshot — we answer.
