

FOCUS FLOW · DAY

Quick Start Guide

from download to your Top 3 in 3 minutes

The screenshot displays the Focus Flow Day app interface. On the left is a sidebar with navigation options: Today (selected), Focus, Tasks (with a red notification badge), Routines, Habits, Week, Dopamine menu, and Settings. The main content area is titled "Good morning, Sam." with a sub-header "Okay today – the plan bends to that." and a "5-min switch" button. Below this is an energy status bar with "Low energy", "Okay" (highlighted in red), and "Charged" buttons. A "Right now" section shows a "Deep work: report" task until 10:30 am with a "Focus on it" button. The "Top 3 today" section lists tasks: "Finish the quarterly report" (1 h 30 min), "Call the dentist to rebook" (10 min), and "Reply to Sam about the invoice" (15 min). A "Quick capture" section has a text input field and a "Park it" button. The "Routines now" section shows "Morning launch" (2 left, 17 min) and "Work start" (3 left, 29 min). The "Habits today" section includes "Move my body", "Water before coffee", "Meds", and "In bed by 11". The "Done today" section shows "Meds" and a total of "5 · 1 h 5 min focus". At the bottom left, a note states "Sam's day: Your data lives only on this device. Shortcuts ?".

Focus Flow Day v1.0

a calm ADHD daily planner with a focus timer, body doubling, task ladder, routines and habits.

Hi. This will be quick.

Focus Flow Day is a real app that lives in a single file. There is no account, no server and nothing to install. You open it, say how much energy you have, pick three things, and press Focus. That's the whole method.

Everything you type stays on your device. Nobody can see it — not us, not anyone. The trade-off is that **you** are in charge of backups (see "Your data"). It's one tap; the app reminds you.

What's in your download

FILE	WHAT IT IS
Focus-Flow-Day.html	The app. Keep this file somewhere safe (your Documents folder is perfect).
Focus-Flow-Day-Quick-Start-Guide.pdf	This guide.
README.txt	The two-line version of this guide, with your iPhone link.

The 3-minute start

- 1 Unzip the download.** Windows: right-click → Extract All. Mac: double-click the ZIP.
- 2 Open Focus-Flow-Day.html.** Double-click it. If it opens in the wrong program, right-click → Open with → Chrome / Edge / Firefox / Safari.
- 3 Bookmark it** (Ctrl/Cmd + D) so it's one click away from now on.
- 4 Answer 3 quick questions:** your name, the routines you'd like, and three things on your mind. Or tap *"Explore with example data"* first.
- 5 Pick your Top 3** and press **Start focus**. Everything you finish lands in "Done today".

Nothing you do here is permanent. Every delete has an Undo. "Start fresh" is always in Settings. Play.

Energy first, then three things

Energy check-in. Low, okay or charged. On a low day the app suggests small, easy tasks and shorter focus blocks; on a charged day it nudges you towards the hard thing. Anything done on a low day counts double.

Top 3. Three is the limit on purpose. "Pick from tasks" shows suggestions sorted by due date and energy fit. Star a task to add it; star again to remove.

Right now. One thing, not a list. Do it, tap Done, pick another — or use the first Top 3 item.

Quick capture. Type "call dentist 10m low tomorrow" and press Enter. It understands minutes, energy words and today/tomorrow. Everything lands in Tasks → Inbox.

Timeline. Three or four generous blocks, not a colour-coded wall. ► on a block starts a focus session for it.

5-min switch. A transition timer for the moment between two things — water, stretch, then the next block.

The timer, and body doubling

Pick a task (type it or tap a suggestion), pick a length, press start. The disc shrinks as time passes — a visual timer for time blindness. Presets change with your energy: on a low day, 5 minutes is a real block.

Body doubling

Working next to someone makes starting easier. Steady noise does a surprising amount of that job. Tap **Body doubling** to play brown, pink, rain-like or white noise (choose in Settings). Headphones help.

Stuck? Shrink it

Opens the task ladder for whatever you're focusing on. Add an embarrassingly small first step and press **5-minute version**.

When the block ends

A gentle chime, the session is logged, and the app offers a small reward from your Dopamine menu. Break for a few minutes, or keep going while it flows.

Space starts and pauses the timer on the Focus screen. **Shift+F** hides everything else.

TASKS

Inbox, Next, Someday, Done

Inbox is everything you captured but haven't sorted. Give a task an energy level or a due date and it moves to **Next**. Send it to **Someday** without guilt, or delete it — deleting is a decision too.

Each task shows the energy it needs, rough minutes, and the next tiny step if you've added one. The ★ puts it in today's Top 3, ⓘ opens the ladder, ► starts a focus block on it.

The task ladder

Task paralysis usually means the first step is too big. Open the ladder and write the smallest possible first step: "open the document", "find the phone number". The first unfinished step is highlighted; tick steps off as you go.

Done keeps the last forty finished tasks. Read it when your brain says you did nothing today.

Same steps, same order, no deciding

Routines

A routine is a list you don't have to remember. Add one from **Templates** (morning launch, shutdown, work start, after-work reset, weekly reset) and cut it down until it's easy. Tick items on the card, or press **Start** to run it one step at a time with the minutes shown. Routines reset every day; a half-done routine still counts.

Habits

Keep it to 3–5. Each shows "done X of the last 14 days" — never a broken streak. Write the **minimum version** for each ("one push-up", "open the book"): the version you can do on the worst day. Tap any day in the grid to toggle it.

Week

Top 3 per day (tap a day to plan it), focus minutes per day, and a five-minute review: one thing that went well, one thing to drop, one change.

Dopamine menu

Appetizers (2–5 min), mains (30–60 min) and desserts. Pre-decided joy so you don't doom-scroll by default. The app offers one after every finished focus block.

Where your data lives, and how to keep it safe

The app saves automatically to your browser's local storage on this device. It never sends anything anywhere. That means two things:

✓ Private by design

No account, no password, no email, no tracking. Closing the tab, restarting the computer, going offline — all fine, your data is still there when you come back.

⚠ Backups are yours to make

Clearing browser data, using a private/incognito window, or some "cleaner" apps can wipe local storage. So, once in a while (the app reminds you after 14 days of changes):

- 1 Settings → **Download backup**. A small .json file lands in your Downloads.
- 2 Move it somewhere you'll find it (a folder, or your cloud drive).
- 3 To restore — on this or any other device — Settings → **Restore a backup** and pick the file.

Encrypted backups

Settings → **Encrypted backup** locks the file with a passphrase you choose (AES-256). Perfect for cloud drives. There is no reset — if you lose the passphrase, nobody can open it, not even us.

Using the app in a private/incognito window will lose your data when the window closes. Use a normal window.

Sharing a home or a household? Each person opens the file in their own browser profile — data is kept separately.

Opening the app on each device

DEVICE	HOW
Windows	Keep the .html file in Documents. Double-click → opens in Edge or Chrome. Bookmark it. Optional: in Edge/Chrome, menu → "Install page as app" / "Create shortcut" → it gets its own window and icon.
Mac	Keep the file in Documents. Double-click → Safari (or right-click → Open With → Chrome). Bookmark it, or drag the address bar icon to the Dock.
Chromebook / Linux	Open the file in Chrome from the Files app. Bookmark it.
Android	Copy the file to your phone (email it to yourself, or use Google Drive → Download). Open it with Chrome from the Files app. Chrome menu : → Add to Home screen gives you an app icon.
iPhone / iPad	Open https://pablo96si.github.io/focusflow-day/ in Safari. Tap the Share button (the square with an arrow) → Add to Home Screen → Add. You now have a Focus Flow icon that opens full-screen, works offline and keeps your data on your phone. The link only serves the app — nothing you type is sent to it. Please keep the link private; it is part of your purchase.

The web-app link works everywhere

The same link also works in Chrome on Android (menu : → Add to Home screen), in Edge/Chrome on Windows (Install app) and in Safari on Mac. Use the file or the link — whichever you prefer. Data is stored separately in each, so pick one and use a backup file to move between them.

Moving to a new device

Old device: Settings → Download backup. New device: open the app → Settings → Restore a backup. Two minutes.

Updates

Re-download from your Etsy purchases page any time. Open the new file, then Restore a backup if your data isn't already there.

Little questions, quick answers

I never finish my Top 3.

Then it was Top 4. Make tomorrow's smaller. The point is a finish line you can actually see, not a perfect score.

The noise doesn't play.

Browsers only start audio after you tap something. Tap the Body doubling button once, and check the phone isn't on silent. On iPhone, the Home Screen version plays audio more reliably than a file.

Can I use it for work and home?

Yes — tag tasks with a project word ("work", "home") and filter by searching. Or keep two copies of the file in two folders; each has its own data.

The timer keeps running if I leave the screen?

Yes. It runs in the background of the app and shows the time left next to Focus in the menu and in the tab title.

Something looks wrong on my screen.

Try a different browser (Chrome, Edge, Firefox and Safari are all supported), and make sure it's up to date. Then message us on Etsy with a screenshot — we answer.
